TITLE III—NATIONAL SCIENCE FOUNDATION FOR THE FUTURE

SEC. 10301. FINDINGS.

Congress finds the following:
(1) Over the past seven decades, the National Science Foundation has played a critical role in advancing the United States academic research enterprise by supporting fundamental research and education across science and engineering disciplines.

(2) Discoveries enabled by sustained investment in fundamental research and the education of the United States science and engineering workforce have led to transformational innovations and spawned new industries.

(3) While the traditional approach to investment in research has delivered myriad benefits to society, a concerted effort is needed to ensure the benefits of federally funded science and engineering are enjoyed by all Americans.

(4) As countries around the world increase investments in research and STEM education, United States global leadership in science and engineering is eroding, posing significant risks to economic competitiveness, national security, and public well-being.

(5) To address major societal challenges and sustain United States leadership in innovation, the Federal Government must increase investments in research, broaden participation in the STEM workforce, and bolster collaborations among universities,
National Laboratories, field stations and marine laboratories, companies, labor organizations, non-profit funders of research, local policymakers, civil societies and stakeholder communities, and international partners.

(a) FINDINGS.—Congress finds the following:

(1) The Department of Defense began developing the Arecibo Observatory located in Barrio Esperanza, Arecibo, Puerto Rico, during the 1950s, and its characteristic instrument, a large radio telescope of 305 meters in diameter was completed in 1963.

(2) The facility was later owned by the National Science Foundation, and supported by the National Aeronautics and Space Administration and various university partners.
(3) The Arecibo Observatory’s 305-meter fixed spherical radio telescope, was the world’s largest single-dish radio telescope until the Five-Hundred-Meter Aperture Spherical Radio Telescope located in Gizhou, China, began observing in 2016.

(4) The 305-meter radio telescope made unparalleled contributions to the fields of radio astronomy, planetary, and atmospheric sciences, and played a role in inspiring thousands of students in Puerto Rico, the Nation, and the world to pursue careers in STEM fields through the Arecibo Observatory Education and Public Outreach Programs.

(5) The radio telescope significantly advanced the field of radio astronomy, including the first indirect detection of gravitational waves, the first detection of extrasolar planets, innumerable contributions to the field of time domain astronomy and the study of the interstellar medium, and played a key role in the search for extraterrestrial intelligence.

(6) The Arecibo Observatory had the best planetary radar system in the world, used by the National Aeronautics and Space Administration for near-Earth object detection and was an essential part of the agency’s planetary defense program.
(7) The planetary radar at the Arecibo Observatory has contributed fundamentally and significantly to the knowledge of the solar system.

(8) The Arecibo Observatory's Incoherent Scatter Radar and supporting facilities have provided fundamental understanding of the ionosphere and upper atmosphere, and the interface between the atmosphere and space that protects the planet from solar wind, meteors, and other potential threats.

(9) December 1, 2021, marks the 1-year anniversary of the uncontrolled collapse sustained by the radio telescope after a series of cable failures in tower 4.

(b) SENSE OF CONGRESS.—It is the sense of Congress that the Congress—

**TITLE IV—BIOECONOMY**

**RESEARCH AND DEVELOPMENT**

**SEC. 10401. FINDINGS.**

The Congress makes the following findings:

(1) Cellular and molecular processes may be
used, mimicked, or redesigned to develop new prod-
ucts, processes, and systems that improve societal
well-being, strengthen national security, and con-
tribute to the economy.

(2) Engineering biology relies on a workforce
with a diverse and unique set of skills combining the
biological, physical, chemical, and information
sciences and engineering.

(3) Long-term research and development is nec-
essary to create breakthroughs in engineering biol-
ogy. Such research and development requires govern-
ment investment as many of the benefits are too dis-
tant or uncertain for industry to support alone.

(4) Research is necessary to inform evidence-
based governance of engineering biology and to sup-
port the growth of the engineering biology industry.

(5) The Federal Government has an obligation
to ensure that ethical, legal, environmental, safety,
security, and societal implications of its science and
technology research and investment follows policies
of responsible innovation and fosters public trans-
parency.

(6) The Federal Government can play an im-
portant role by facilitating the development of tools
and technologies to further advance engineering biol-
ogy, including user facilities, by facilitating public-
private partnerships, by supporting risk research,
and by facilitating the commercial application in the
United States of research funded by the Federal
Government.

(7) The United States led the development of
the science and engineering techniques that created
the field of engineering biology, but due to increas-
ing international competition, the United States is
at risk of losing its competitive advantage if it does
not strategically invest the necessary resources.
(8) A National Engineering Biology Initiative can serve to establish new research directions and technology goals, improve interagency coordination and planning processes, drive technology transfer to the private sector, and help ensure optimal returns on the Federal investment.

TITLE V—BROADENING PARTICIPATION IN SCIENCE
Subtitle A—STEM Opportunities

SEC. 10501. FINDINGS.

The Congress finds the following:

(1) Many reports over the past decade have found that it is critical to our Nation’s economic leadership and global competitiveness that the United States educates and trains more scientists and engineers.

(2) Research shows that women and minorities who are interested in STEM careers are disproport-
tionately lost at nearly every educational transition and at every career milestone.

(3) The National Center for Science and Engineering Statistics at the National Science Foundation collects, compiles, analyzes, and publishes data on the demographics of STEM degrees and STEM jobs in the United States.

(4) Women now earn nearly 37 percent of all STEM bachelor’s degrees, but major variations persist among fields. In 2017, women earned only 20 percent of all bachelor’s degrees awarded in engineering and 19 percent of bachelor’s degrees awarded in computer sciences. Based on Bureau of Labor Statistics data, jobs in computing occupations are expected to account for nearly 60 percent of the projected annual growth of newly created STEM job openings from 2016 to 2026.

(5) In 2017, underrepresented minority groups comprised 39 percent of the college-age population of the United States, but only 18 percent of students who earned bachelor’s degrees in STEM fields. The Higher Education Research Institute at the University of California, Los Angeles, found that, while freshmen from underrepresented minority groups express an interest in pursuing a STEM un-
dergraduate degree at the same rate as all other freshmen, only 22.1 percent of Latino students, 18.4 percent of African-American students, and 18.8 percent of Native American students studying in STEM fields complete their degree within 5 years, compared to approximately 33 percent of White students and 42 percent of Asian students who complete their degree within 5 years.

(6) In some STEM fields, including the computer sciences, women persist at about the same rate through doctorate degrees. In other STEM fields, women persist through doctorate degrees at a lower rate. In mathematics, women earn just 26 percent of doctorate degrees compared with 42 percent of undergraduate degrees. Overall, women earned 38 percent of STEM doctorate degrees in 2016. The rate of minority students earning STEM doctorate degrees in physics is 9 percent, compared with 15 percent for bachelor’s degree. Students from underrepresented minority groups accounted for only 11.5 percent of STEM doctorate degrees awarded in 2016.

(7) The representation of women in STEM drops significantly from the doctorate degree level to the faculty level. Overall, women hold only 26 per-
cent of all tenured and tenure-track positions and 27 percent of full professor positions in STEM fields in our Nation’s universities and 4-year colleges. Black and Hispanic faculty together hold about 6.8 percent of all tenured and tenure-track positions and 7.5 percent of full professor positions. Many of the numbers in the American Indian or Alaskan Native and Native Hawaiian or Other Pacific Islander categories for different faculty ranks were too small for the National Science Foundation to report publicly without potentially compromising confidential information about the individuals being surveyed.

(8) The representation of women is especially low at our Nation’s top research universities. Even in the biological sciences, in which women now earn more than 50 percent of the doctorates and passed the 25 percent level 37 years ago, women make up only 25 percent of the full professors at the approximately 100 most research-intensive universities in the United States. In the physical sciences and mathematics, women make up only 11 percent of full professors, in computer sciences only 10 percent, and across engineering fields only 7 percent. The data suggest that approximately 6 percent of all tenure-track STEM faculty members at the most re-
search-intensive universities are from underrep-
resented minority groups, but in some fields the
numbers are too small to report publicly.

(9) By 2050, underrepresented minorities will
comprise 52 percent of the college-age population of
the United States. If the percentage of female stu-
dents and students from underrepresented minority
groups earning bachelor’s degrees in STEM fields
does not significantly increase, the United States
will face an acute shortfall in the overall number of
students who earn degrees in STEM fields just as
United States companies are increasingly seeking
students with those skills. With this impending
shortfall, the United States will almost certainly lose
its competitive edge in the 21st century global econ-
omy.

(10) According to a 2014 Association for
Women in Science survey of over 4,000 scientists
across the globe, 70 percent of whom were men,
STEM researchers face significant challenges in
work-life integration. Researchers in the United
States were among the most likely to experience a
conflict between work and their personal life at least
weekly. One-third of researchers surveyed said that
ensuring good work-life integration has negatively
impacted their careers, and, of researchers intending
to leave their current job within the next year, 9
percent indicated it was because they were unable to
balance work and life demands.

(11) Female students and students from under-
represented minority groups at institutions of higher
education who see few others “like themselves”
among faculty and student populations often do not
experience the social integration that is necessary for
success in all disciplines, including STEM.

(12) One in five children in the United States
attend school in a rural community. The data shows
that rural students are at a disadvantage with re-
spect to STEM readiness. Among STEM-interested
students, 17 percent of students in rural high
schools and 18 percent of students in town-located
high schools meet the ACT STEM Benchmark, com-
pared with 33 percent of students in suburban high
schools and 27 percent of students in urban high
schools.

(13) A substantial body of evidence establishes
that most people hold implicit biases. Decades of
cognitive psychology research reveal that most peo-
ple carry prejudices of which they are unaware but
that nonetheless play a large role in evaluations of
people and their work. Unintentional biases and out-
moded institutional structures are hindering the ac-
cess and advancement of women, minorities, and
other groups historically underrepresented in STEM.

(14) Workshops held to educate faculty about
unintentional biases have demonstrated success in
raising awareness of such biases.

(15) In 2012, the Office of Diversity and Equal
Opportunity of the National Aeronautics and Space
Administration (in this subtitle referred to as
“NASA”) completed a report that—

(A) is specifically designed to help NASA
grant recipients identify why the dearth of
women in STEM fields continues and to ensure
that it is not due to discrimination; and

(B) provides guidance that is usable by all
institutions of higher education receiving sig-
ificant Federal research funding on how to
conduct meaningful self-evaluations of campus
culture and policies.

(16) The Federal Government provides 55 per-
cent of research funding at institutions of higher
education and, through its grant-making policies,
has had significant influence on institution of higher
education policies, including policies related to institutional culture and structure.

SEC. 10502. PURPOSES.

The purposes of this subtitle are as follows:

(1) To ensure that Federal science agencies and institutions of higher education receiving Federal research and development funding are fully engaging the entire talent pool of the United States.

(2) To promote research on, and increase understanding of, the participation and trajectories of women, minorities, and other groups historically underrepresented in STEM studies and careers, including persons with disabilities, older learners, veterans, and rural, poor, and tribal populations, at institutions of higher education and Federal science agencies, including Federal laboratories.

(3) To raise awareness within Federal science agencies, including Federal laboratories, and institutions of higher education about cultural and institutional barriers limiting the recruitment, retention, promotion, and other indicators of participation and achievement of women, minorities, and other groups historically underrepresented in academic and Government STEM research careers at all levels.
(4) To identify, disseminate, and implement best practices at Federal science agencies, including Federal laboratories, and at institutions of higher education to remove or reduce cultural and institutional barriers limiting the recruitment, retention, and success of women, minorities, and other groups historically underrepresented in academic and Government STEM research careers.

(5) To provide grants to institutions of higher education to recruit, retain, and advance STEM faculty members from underrepresented minority groups and to implement or expand reforms in undergraduate STEM education in order to increase the number of students from underrepresented minority groups receiving degrees in these fields.

Subtitle B—Rural STEM Education

Research

SEC. 10521. FINDINGS.

Congress finds the following:

(1) The supply of STEM workers is not keeping pace with the rapidly evolving needs of the public and private sector, resulting in a deficit often referred to as a STEM skills shortage.

(2) According to the Bureau of Labor Statistics, the United States will need one million additional STEM professionals than it is on track to produce in the coming decade.

(3) Many STEM occupations offer higher wages, more opportunities for advancement, and a higher degree of job security than non-STEM jobs.

(4) The 60,000,000 individuals in the United States who live in rural settings are significantly under-represented in STEM.

(5) According to the National Center for Education Statistics, nine million students in the United States—nearly 20 percent of the total K–12 population—attend rural schools, and for reasons ranging from teacher quality to shortages of resources, these students often have fewer opportunities for
high-quality STEM learning than their peers in the Nation’s urban and suburban schools.

(6) Rural areas represent one of the most promising, yet underutilized, opportunities for STEM education to impact workforce development and regional innovation, including agriculture.

(7) The study of agriculture, food, and natural resources involves biology, engineering, physics, chemistry, math, geology, computer science, and other scientific fields.

(8) Employment in computer and information technology occupations is projected to grow 11 percent from 2019 to 2029. To help meet this demand, it is important rural students have the opportunity to acquire computing skills through exposure to computer science learning in grades Pre–K through 12 and in informal learning settings.

(9) More than 293,000,000 individuals in the United States use high-speed broadband to work, learn, access healthcare, and operate their businesses, while 19,000,000 individuals in the United States still lack access to high-speed broadband. Rural areas are hardest hit, with over 26 percent of individuals in rural areas in the United States lacking access to high-speed broadband compared to 1.7
percent of individuals in urban areas in the United States.

Subtitle C—MSI STEM Achievement

SEC. 10531. FINDINGS.

Congress makes the following findings:

(1) Evidence suggests that the supply of STEM workers is not keeping pace with the rapidly evolving needs of the public and private sector, resulting in a deficit often referred to as a STEM skills shortage.

(2) According to the Bureau of Labor Statistics, the United States will need one million additional STEM professionals than it is on track to produce in the coming decade.

(3) STEM occupations offer higher wages, more opportunities for advancement, and a higher degree of job security than non-STEM occupations.

(4) The composition of the STEM workforce does not reflect the current or projected diversity of the Nation, with Hispanics, African Americans, and
other racial and ethnic minorities, significantly underrepresented in the STEM workforce compared to their presence in the workforce more generally.

(5) A stronger national commitment to increasing the diversity of the STEM workforce is needed to help address the STEM skills shortage.

(6) According to a 2019 National Academies of Sciences, Engineering, and Medicine report entitled “Minority Serving Institutions: America’s Underutilized Resource for Strengthening the STEM Workforce”, 2- and 4-year minority serving institutions enroll nearly 30 percent of all undergraduate students—a percentage that is expected to grow in the coming years—in the United States higher education system and play a critical role in providing important pathways to STEM-related education, training, and careers for students of color.

(7) HBCUs, TCUs, and MSIs are highly successful at educating underrepresented minority students in STEM fields and can serve as best practice models for other colleges and universities to further expand participation of underrepresented minorities in the STEM workforce.

(8) Increased investment in STEM infrastructure at HBCUs, TCUs, and MSIs has the potential
to increase these institutions’ ability to educate even more students in the STEM disciplines.

(9) With the demand for STEM skills exceeding the supply of STEM graduates, success of HBCUs, TCUs, and MSIs in educating and training science and engineering leaders is increasingly important for United States economic growth and competitiveness.

SEC. 10532. GOVERNMENT ACCOUNTABILITY OFFICE REVIEW.

Not later than 3 years after the date of enactment of this Act, the Comptroller General of the United States shall report to Congress—

(1) an inventory of competitive funding programs and initiatives carried out by Federal science agencies that are targeted to HBCUs, TCUs, and MSIs or partnerships with HBCUs, TCUs, and MSIs;

(2) an assessment of Federal science agency outreach activities to increase the participation and competitiveness of HBCUs, TCUs, and MSIs in the funding programs and initiatives identified in paragraph (1); and

jointly developed and managed, draws from the capacities of each institution, and is mutually beneficial; and

(3) encourage proposals submitted in partnership with the private sector, non-profit organizations, Federal laboratories, and international research institutions, as appropriate.

(f) MSI CENTERS OF INNOVATION.—Grants under this section may fund the establishment of no more than five MSI Centers of Innovation to leverage successes of HBCUs, TCUs, and MSIs in STEM education and research training of underrepresented minority students as models for other institutions, including both HBCUs, TCUs, and MSIs and institutions of higher education that are not HBCUs, TCUs, or MSIs. Such centers will be located on campuses of selected institutions of higher education and serve as incubators to allow institutions of higher education to experiment, pilot, evaluate, and scale up promising practices.

(g) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated to the Director of the National Science Foundation $170,000,000 for fiscal year 2022, $175,000,000 for fiscal year 2023, $180,000,000 for fiscal year 2024, $185,000,000 for fiscal year 2025,

Subtitle D—Combating Sexual Harassment in Science

SEC. 10541. FINDINGS.

Congress makes the following findings:

(1) According to the report issued by the National Academies of Sciences, Engineering, and Medicine in 2018 entitled “Sexual Harassment of Women: Climate, Culture, and Consequences in Academic Sciences, Engineering, and Medicine”—

(A) sexual harassment is pervasive in institutions of higher education;

(B) the most common type of sexual harassment is gender harassment, which includes verbal and nonverbal behaviors that convey insulting, hostile, and degrading attitudes about members of one gender;
(C) 58 percent of individuals in the academic workplace experience sexual harassment, the second highest rate when compared to the military, the private sector, and Federal, State, and local government;

(D) women who are members of racial or ethnic minority groups are more likely to experience sexual harassment and to feel unsafe at work than White women, White men, or men who are members of such groups;

(E) the training for each individual who has a doctor of philosophy in the science, technology, engineering, and mathematics fields is estimated to cost approximately $500,000; and

(F) attrition of an individual so trained results in a loss of talent and money.

(2) Sexual harassment undermines career advancement for women.

(3) According to a 2017 University of Illinois study, among astronomers and planetary scientists, 18 percent of women who are members of racial or ethnic minority groups and 12 percent of White women skipped professional events because they did not feel safe attending.
(4) Many women report leaving employment at institutions of higher education due to sexual harassment.

(5) Research shows the majority of individuals do not formally report experiences of sexual harassment due to a justified fear of retaliation or other negative professional or personal consequences.

(6) Reporting procedures with respect to such harassment are inconsistent among Federal science agencies and have varying degrees of accessibility.

(7) There is not adequate communication among Federal science agencies and between such agencies and grantees regarding reports of sexual harassment, which has resulted in harassers receiving Federal funding after moving to a different institution.

actually agreed to by the parties. The labor organization and employer must each select the members of the tripartite arbitration panel within 14 days of the Service’s referral; if the labor organization or employer fail to do so, the Service shall designate any members not selected by the labor organization or the employer. A majority of the tripartite arbitration panel shall render a decision settling the dispute as soon as practicable and not later than within 120 days, absent extraordinary circumstances or by agreement or permission of the parties, and such decision shall be binding upon the parties for a period of 2 years, unless amended during such period by written consent of the parties. DIVISION D—COMMITTEE ON FOREIGN AFFAIRS

SEC. 30000. SHORT TITLE.

(a) SHORT TITLE.—This division may be cited as the “Ensuring American Global Leadership and Engagement Act” or the “EAGLE Act”.

SEC. 30001. DEFINITIONS.

In this division:

(1) APPROPRIATE CONGRESSIONAL COMMITTEES.—Unless otherwise defined, the term “appropriate congressional committees” means—

(A) the Committee on Foreign Affairs of the House of Representatives; and

(B) the Committee on Foreign Relations of the Senate.

(2) CCP.—The term “CCP” means the Chinese Communist Party.

(3) PEOPLE’S LIBERATION ARMY; PLA.—The terms “People’s Liberation Army” and “PLA” mean the armed forces of the People’s Republic of China.
(4) PRC; CHINA.—The terms “PRC” and “China” mean the People’s Republic of China.

SEC. 30002. FINDINGS.

Congress makes the following findings:

(1) The People’s Republic of China (PRC) is leveraging its political, diplomatic, economic, military, technological, and ideological power to become a strategic, near-peer, global competitor of the United States. The policies increasingly pursued by the PRC in these domains are contrary to the interests and values of the United States, its partners, and much of the rest of the world.

(2) A number of policies being pursued by the PRC—

(A) threaten the future character of the international order and are shaping the rules, norms, and institutions that govern relations among states;

(B) will put at risk the ability of the United States to secure its national interests; and

(C) will put at risk the future peace, prosperity, and freedom of the international community in the coming decades.
(3) After normalizing diplomatic relations with the PRC in 1979, the United States actively worked to advance the PRC’s economic and social development to ensure that it participated in, and benefited from, the free and open international order. The United States pursued these goals and contributed to the welfare of the Chinese people by—

(A) increasing the PRC’s access to global capital markets;

(B) promoting the PRC’s accession to the World Trade Organization;

(C) providing development finance and technical assistance;

(D) promoting research collaboration;

(E) educating the PRC’s top students;

(F) permitting transfers of cutting-edge technologies and scientific knowledge; and

(G) providing intelligence and military assistance.

(4) It is now clear that the PRC has chosen to pursue state-led, mercantilist economic policies, an increasingly authoritarian governance model at home through increased restrictions on personal freedoms, and an aggressive and assertive foreign policy. These policies frequently and deliberately undermine
United States interests and are contrary to core United States values and the values of other nations, both in the Indo-Pacific and beyond. In response to this strategic decision of the CCP, the United States has been compelled to reexamine and revise its strategy towards the PRC and reanimate its defense of the international order.

(5) The General Secretary of the CCP and the Chairman of the People’s Republic of China, Xi Jinping, has elevated the “Great Rejuvenation of the Chinese Nation” as central to the domestic and foreign policy of the PRC. His program demands—

(A) strong, centralized CCP leadership;

(B) concentration of military power;

(C) a dominant role for the CCP in the state and the economy;

(D) an aggressive foreign policy seeking control over broadly asserted territorial claims; and

(E) the denial of any universal values and individual rights that are deemed to threaten the CCP.

(6) The PRC views its Leninist model of governance as superior to, and at odds with, the constitutional models of the United States and other de-
democracies. This approach to governance is lauded by the CCP as essential to securing the PRC’s status as a global leader, and to shaping the future of the world. In a 2013 speech, General Secretary Xi said, “We firmly believe that as socialism with Chinese characteristics develops further * * * it is * * * inevitable that the superiority of our socialist system will be increasingly apparent * * * [and] our country’s road of development will have increasingly greater influence on the world.”

(7) The PRC’s objectives are to first establish regional hegemony over the Indo-Pacific and then to use that dominant position to propel the PRC to become the “leading world power”, shaping an international order that is conducive to its interests. Achieving these objectives requires turning the PRC into a wealthy nation under strict CCP rule by using a strong military and advanced technological capability to pursue the PRC’s objectives, regardless of other countries’ interests.

(8) The PRC is reshaping the current international order, which is built upon the rule of law and free and open ideals and principles, by conducting global information and influence operations, seeking to redefine international laws and norms to
align with the objectives of the CCP, rejecting the
legitimacy of internationally recognized human
rights, and seeking to co-opt the leadership and
agenda of multinational organizations for the benefit
of the PRC and other authoritarian regimes at the
expense of the interests of the United States and the
international community.

(9) The PRC is encouraging other countries to
follow its model of development and governance.
During the 19th Party Congress in 2017, General
Secretary Xi said that the PRC could serve as a
model of development for other countries by utilizing
“Chinese wisdom” and a “Chinese approach to solv-
ing problems”.

(10) The PRC is promoting its governance
model and attempting to weaken other models of
governance by—

(A) undermining democratic institutions;

(B) subverting financial institutions;

(C) coercing businesses to accommodate
the policies of the PRC; and

(D) using disinformation to disguise the
nature of the actions described in subpara-
graphs (A) through (C).
(11) The PRC is progressing toward becoming the global leader in science and technology. In May 2018, General Secretary Xi said that for the PRC to reach “prosperity and rejuvenation”, it needs to “endeavor to be a major world center for science and innovation”. The PRC has invested the equivalent of billions of dollars into education and research and development and established joint scientific research centers and science universities.

(12) The PRC’s drive to become a “manufacturing and technological superpower” and to promote “innovation with Chinese characteristics” is coming at the expense of human rights and long-standing international rules and norms with respect to economic competition, and presents a challenge to United States national security and the security of allies and like-minded countries. In particular, the PRC advances its illiberal political and social policies through mass surveillance, social credit systems, and a significant role of the state in internet governance. Through these means, the PRC increases direct and indirect government control over its citizens’ everyday lives. Its national strategy of “civil-military fusion” mandates that civil and commercial research,
which increasingly drives global innovation, is lever-
aged to develop new military capabilities.

(13) The PRC is using legal and illegal means
to achieve its objective of becoming a manufacturing
and technological superpower. The PRC uses state-
directed industrial policies in anticompetitive ways to
ensure the dominance of PRC companies. The CCP
engages in and encourages actions that actively un-
dermine a free and open international market, such
as intellectual property theft, forced technology
transfers, regulatory and financial subsidies, and
mandatory CCP access to proprietary data as part
of business and commercial agreements between Chi-
nese and foreign companies.

(14) The policies referred to in paragraph (13)
are designed to freeze United States and other for-
eign firms out of the PRC market, while eroding
competition in other important markets. The heavy
subsidization of Chinese companies includes poten-
tial violation of its World Trade Organization com-
mitments. In May 2018, General Secretary Xi said
that the PRC aims to keep the “initiatives of inno-
vation and development security * * * in [China’s]
own hands”.
(15) The PRC is advancing its global objectives through a variety of avenues, including its signature initiative, the Belt and Road Initiative (referred to in this subsection as “BRI”), which is enshrined in the Chinese Constitution and includes the Digital Silk Road and Health Silk Road. The PRC describes BRI as a straightforward and wholly beneficial plan for all countries. Eventually, it seeks to create a web of economic relations with the PRC at its center, making it the most concrete geographical representation of the PRC’s global ambitions. BRI increases the economic influence of state-owned PRC firms in global markets, enhances the PRC’s political leverage with government leaders around the world, and provides greater access to strategic nodes such as ports and railways. Through BRI, the PRC seeks political deference through economic dependence.

(16) The PRC is executing a plan to establish regional hegemony over the Indo-Pacific and displace the United States from the region. As a Pacific power, the United States has built and supported enduring alliances and economic partnerships that secure peace and prosperity and promote the rule of law and political pluralism in a free and open Indo-Pacific. In contrast, the PRC uses economic
and military coercion in the region to secure its own interests.

(17) The PRC’s military strategy seeks to keep the United States military from operating in the Western Pacific and erodes United States security guarantees.

(18) The PRC is aggressively pursuing exclusive control of critical land routes, sea lanes, and air space in the Indo-Pacific in the hopes of eventually exercising greater influence beyond the region. This includes lanes crucial to commercial activity, energy exploration, transport, and the exercise of security operations in areas permitted under international law.

(19) The PRC seeks so-called “reunification” with Taiwan through whatever means may ultimately be required. The CCP’s insistence that so-called “reunification” is Taiwan’s only option makes this goal inherently coercive. In January 2019, General Secretary Xi stated that the PRC “make[s] no promise to renounce the use of force and reserve[s] the option of taking all necessary means”. Taiwan’s embodiment of democratic values and economic liberalism challenges General Secretary Xi’s goal of achieving national rejuvenation. The PRC plans to
exploit Taiwan’s dominant strategic position in the
First Island Chain and to project power into the
Second Island Chain and beyond.

(20) In the South China Sea, the PRC has exe-
cuted an illegal island-building campaign that
threatens freedom of navigation and the free-flow of
commerce, damages the environment, bolsters the
PLA power projection capabilities, and coerces and
intimidates other regional claimants in an effort to
advance its unlawful claims and control the waters
around neighboring countries. Despite General Sec-
retary Xi’s September 2015 speech, in which he said
the PRC was not militarizing the South China Sea,
during the 2017 19th Party Congress, General Sec-
retary Xi announced that “construction on islands
and reefs in the South China Sea have seen steady
progress”.

(21) The PRC is rapidly modernizing the PLA
to attain a level of capacity and capability superior
to the United States in terms of equipment and con-
duct of modern military operations by shifting its
military doctrine from having a force “adequate
[for] China’s defensive needs” to having a force
“commensurate with China’s international status”.
Ultimately, this transformation could enable China
to impose its will in the Indo-Pacific region through
the threat of military force. In 2017, General Sec-
retary Xi established the following developmental
benchmarks for the advancement of the PLA:

(A) A mechanized force with increased
informatized and strategic capabilities by 2020.
(B) The complete modernization of China’s
national defense by 2035.
(C) The full transformation of the PLA
into a world-class force by 2050.

(22) The PRC’s strategy and supporting poli-
cies described in this subsection undermine United
States interests, such as—

(A) upholding a free and open inter-
national order;
(B) maintaining the integrity of inter-
national institutions with liberal norms and val-
ues;
(C) preserving a favorable balance of
power in the Indo-Pacific;
(D) ensuring the defense of its allies;
(E) preserving open sea and air lanes;
(F) fostering the free flow of commerce
through open and transparent markets; and
(G) promoting individual freedom and human rights.

(23) The global COVID–19 pandemic has intensified and accelerated these trends in the PRC’s behavior and therefore increased the need for United States global leadership and a competitive posture. The PRC has capitalized on the world’s focus on the COVID–19 pandemic by—

(A) moving rapidly to undermine Hong Kong’s autonomy, including imposing a so-called “national security law” on Hong Kong;

(B) aggressively imposing its will in the East and South China Seas;

(C) increasing its territorial aggression in South Asia, including against India; and

(24) The CCP’s disinformation campaign referred to in paragraph (23)(D) has included—
(A) concerted efforts, in the early days of the pandemic, to downplay the nature and scope of the outbreak in Wuhan in the PRC, as well as cases of person-to-person transmission;

(B) claims that the virus originated in United States biological defense research at Fort Detrick, Maryland;

(C) Chinese state media reports insinuating a possible link between the virus and other United States biological facilities; and

(D) efforts to block access to qualified international infectious disease experts who might contradict the CCP’s narrative.

(25) In response to the PRC’s strategy and policies, the United States must adopt a policy of strategic competition with the PRC to protect and promote our vital interests and values.

(26) The United States policy of strategic competition with respect to the People’s Republic of China is part of a broader strategic approach to the Indo-Pacific and the world that aligns with cooperation with United States allies and partners to advance shared values and interests and to preserve and enhance a free, open, democratic, inclusive, rules-based, stable, and diverse region.
The Asia Reassurance Initiative Act of 2018 (Public Law 115–409) contributed to a comprehensive framework for promoting United States security interests, economic interests, and values in the Indo-Pacific region, investing $7,500,000,000 over 5 years—

(B) to advance democracy and the protection and promotion of human rights in the Indo-Pacific region;

(C) to enhance cybersecurity cooperation between the United States and partners in the Indo-Pacific;

SEC. 30202. UNITED STATES COMMITMENT AND SUPPORT FOR ALLIES AND PARTNERS IN THE INDO-PACIFIC.

(a) Sense of Congress.—It is the sense of Congress that—
(1) the United States treaty alliances in the Indo-Pacific provide a unique strategic advantage to the United States and are among the Nation’s most precious assets, enabling the United States to advance its vital national interests, defend its territory, establish enduring cooperation with allies while seeking to establish new partnerships, prevent the domination of the Indo-Pacific and its surrounding maritime and air lanes by a hostile power or powers, and deter potential aggressors;

(2) the Governments of the United States, Japan, South Korea, Australia, the Philippines, and Thailand are critical allies in advancing a free and open order in the Indo-Pacific region and tackling challenges with unity of purpose, and have collaborated to advance specific efforts of shared interest in areas such as defense and security, infrastructure connectivity, and fundamental freedoms;

(3) the United States greatly values other partnerships in the Indo-Pacific region, including with India, Singapore, Indonesia, Taiwan, New Zealand, and Vietnam, as well as its trilateral and quadrilateral dialogues, and regional architecture such as the Association of Southeast Asian Nations (ASEAN),
and the Asia-Pacific Economic Cooperation, which
are essential to further shared interests;

demands consistent United States and allied com-
mitment to strengthening and advancing alliances so
that they are postured to meet these challenges, and
will require sustained political will, concrete partner-
ships, economic, commercial, technological, and secu-

rity cooperation, consistent and tangible commit-
ments, high-level and extensive consultations on
matters of mutual interest, mutual and shared co-
operation in the acquisition of key capabilities im-
portant to allied defenses, and unified mutual sup-
port in the face of political, economic, or military co-

region;

the Expert Group of the International Military
Council on Climate and Security (IMCCS), entitled
“Climate and Security in the Indo-Asia Pacific” noted, the Indo-Pacific region is one of the regions most vulnerable to climate impacts, and as former Deputy Under Secretary of Defense for Installations and Environment Sherri Goodman, Secretary General of IMCCS, noted, climate shocks act as a threat multiplier in the Indo-Pacific region, increasing humanitarian response costs and impacting security throughout the region as sea levels rise, fishing patterns shift, food insecurity rises, and storms grow stronger and more frequent;

(8) the United States should continue to engage on and deepen cooperation with allies and partners of the United States in the Indo-Pacific region, as laid out in the Asia Reassurance Initiative Act (Public Law 115–409), in the areas of—

(A) forecasting environmental challenges;

cusing on internal and external actions needed—

(A) to facilitate regional early recovery,
risk reduction, and resilience to weather-related
impacts on strategic interests of the United
States and partners and allies of the United
States in the region; and

(B) A description of the frequency that civilian defense professionals from Taiwan pursue or are selected for the programs reviewed pursuant to subparagraph (A).

(C) An analysis of any funding, policy, administrative, or other barriers preventing greater participation from Taiwan’s civilian defense professionals in the opportunities identified pursuant to subparagraph (A).

SEC. 30219I. NATIONAL INTELLIGENCE ESTIMATE ON ESCALATION AND DE-ESCALATION OF GRAY ZONE ACTIVITIES IN GREAT POWER COMPETITION.

(a) FINDINGS.—Congress finds the following:

(1) The conventional power of the United States has driven foreign adversaries to a level of competition that does not always depend on military confrontation with the United States.
(2) Rather than challenging the United States in a manner that could provoke a kinetic military response, foreign adversaries of the United States have turned to carrying out gray zone activities to advance the interests of such adversaries, weaken the power of the United States, and erode the norms that underpin the United States-led international order.

(3) Gray zone activity falls on a spectrum of attribution and deniability that ranges from covert adversary operations, to detectible covert adversary operations, to unattributable adversary operations, to deniable adversary operations, to open adversary operations.

(4) To adequately address such a shift to gray zone activity, the United States must understand what actions tend to either escalate or de-escalate such activity by our adversaries.

(5) The laws, principles, and values of the United States are strategic advantages in great power competition with authoritarian foreign adversaries that carry out gray zone activities, because such laws, principles, and values increase the appeal of the governance model of the United States, and
the United States-led international order, to states and peoples around the world.

(6) The international security environment has demonstrated numerous examples of gray zone activities carried out by foreign adversaries, including the following activities of foreign adversaries:

(A) Information operations, such as efforts by Russia to influence the 2020 United States Federal elections (as described in the March 15, 2021, intelligence community assessment of the Office of the Director of National Intelligence made publicly available on March 15, 2021).

(B) Adversary political coercion operations, such as the wielding of energy by Russia, particularly in the context of Ukrainian gas pipelines, to coerce its neighbors into compliance with its policies.

(C) Cyber operations, such as the use by China of cyber tools to conduct industrial espionage.

(D) Provision of support to proxy forces, such as the support provided by Iran to Hezbollah and Shia militia groups.

(E) Provocation by armed forces controlled by the government of the foreign adversary
through measures that do not rise to the level of an armed attack, such as the use of the China Coast Guard and maritime militia by China to harass the fishing vessels of other countries in the South China Sea.

(F) Alleged uses of lethal force on foreign soil, such as the 2018 attempts by Russia to poison Sergei Skripal in London.

(G) The potential use by an adversary of technology that causes anomalous health incidents among United States Government personnel.

(b) NATIONAL INTELLIGENCE ESTIMATE.—

(1) REQUIREMENT.—The Director of National Intelligence, acting through the National Intelligence Council, shall produce a National Intelligence Estimate on how foreign adversaries use gray zone activities to advance interests, what responses by the United States (or the allies or partners of the United States) would tend to result in the escalation or de-escalation of such gray zone activities by foreign adversaries, and any opportunities for the United States to minimize the extent to which foreign adversaries use gray zone activities in furtherance of great power competition.
(2) MATTERS INCLUDED.—To the extent determined appropriate by the National Intelligence Council, the National Intelligence Estimate produced under paragraph (1) may include an assessment of the following topics:

(A) Any potential or actual lethal or harmful gray zone activities carried out against the United States by foreign adversaries, including against United States Government employees and United States persons, whether located within or outside of the United States.

(B) To the extent such activities have occurred, or are predicted to occur—

   (i) opportunities to reduce or deter any such activities; and

   (ii) any actions of the United States Government that would tend to result in the escalation or de-escalation of such activities.

(C) Any incidents in which foreign adversaries could have used, but ultimately did not use, gray zone activities to advance the interests of such adversaries, including an assessment as to why the foreign adversary ultimately did not use gray zone activities.
(D) The effect of lowering the United States Government threshold for the public attribution of detectible covert adversary operations, unattributable adversary operations, and deniable adversary operations.

(E) The effect of lowering the United States Government threshold for responding to detectible covert adversary operations, unattributable adversary operations, and deniable adversary operations.

(F) The extent to which the governments of foreign adversaries exercise control over any proxies or parastate actors used by such governments in carrying out gray zone activities.

(G) The extent to which gray zone activities carried out by foreign adversaries affect the private sector of the United States.

(H) The international norms that provide the greatest deterrence to gray zone activities carried out by foreign adversaries, and opportunities for strengthening those norms.

(I) The effect, if any, of the strengthening of democratic governance abroad on the resilience of United States allies and partners to gray zone activities.
(J) Opportunities to strengthen the resilience of United States allies and partners to
gray zone activities, and associated tactics, carried out by foreign adversaries.

(K) Opportunities for the United States to improve the detection of, and early warning for,
such activities and tactics.

(L) Opportunities for the United States to galvanize international support in responding to
such activities and tactics.

Subtitle C—Multilateral Strategies to Bolster American Power

SEC. 30231. FINDINGS ON MULTILATERAL ENGAGEMENT.

Congress finds the following:
(1) Every UN member state is legally required to finance the UN’s core budget in order to ensure that these missions are properly resourced, and assessment rates are renegotiated every three years by the UN General Assembly.

(2) While the United States is the largest single financial contributor to the UN system, the current model is beneficial because it requires all UN member states, no matter how big or small, to help shoulder the UN’s regular and peacekeeping budgets at specified levels.

(3) Failing to meet our financial commitments to the UN also empowers the PRC, which has raised our annual shortfalls to claim we are not a reliable partner and is seeking to leverage its own contributions to the regular budget and peacekeeping in ways that run counter to United States interests and values.

(4) The People’s Republic of China is now the second largest financial contributor to UN peacekeeping, having gone from an assessment rate of just 3 percent in 2008 to more than 15 percent today, and is the ninth largest troop-contributor to UN missions, providing more personnel than the
other four permanent members of the Security Council combined.

(5) With greater engagement comes greater influence, and PRC diplomats have sought to use their expanded clout to push back against the human rights, civilian protection, and gender-based violence aspects of UN peacekeeping mandates, using United States funding shortfalls as a pretext.

(6) The PRC has also used its growing clout to fill key posts at UN agencies: Chinese nationals currently occupy the top posts of four of the UN’s 15 specialized agencies, while the United States occupies only one.

(7) From 2021 to 2022, there will be 15 elections for the heads of UN specialized agencies and five for major UN funds and programs. With the exception of the World Food Programme, none are currently led by Americans.

(8) A 2020 Department of State Inspector General Inspection found that the Bureau for International Organizations did not have a standard operating procedure for tracking and promoting the employment of American Citizens in the UN system, and their recommendation to the department to establish one remains open.
It is the policy of the United States that—

(1) the Permanent Representative of the United States to the United Nations serves as a standing member of the cabinet;

(2) assessed dues to multilateral organizations be paid in full in a timely fashion;

(3) Federal agencies utilize all the authorities under section 3343 of title 5, United States Code, and subpart C of title 5, Code of Federal Regulations (relating to detail and transfer of Federal employees to international organizations), to detail or transfer employees to relevant international organizations;

(4) the Secretary of State should assist the Department of State and other Federal agencies in carrying out paragraph (3) to the fullest extent;

(5) the Secretary of State should support qualified American candidates in their bid to win election to United Nations-related leadership positions; and

(6) the Secretary of State should support the placement of Junior Professional Officers sponsored by the United States in United Nations-affiliated agencies.

(3) monitoring the pipeline of United Nations jobs and identifying qualified United States citizens and other qualified nationals to promote for such positions;

(4) tracking leadership changes in United Nations Secretariat, funds, programs, and agencies, and developing strategies to ensure that coalitions of like-minded countries are assembled to ensure lead-
embership races are not won by countries that do not share United States interests;

(5) eliminating current barriers to the employment of United States citizens in the United Nations Secretariat, funds, programs, and agencies; and

in subsection (a) regarding the implementation of this section, including examples of successes and challenges.

SEC. 30249. ENGAGEMENT WITH CIVIL SOCIETY IN LATIN AMERICA AND THE CARIBBEAN REGARDING ACCOUNTABILITY, HUMAN RIGHTS, AND THE RISKS OF PERVERSIVE SURVEILLANCE TECHNOLOGIES.

(a) SENSE OF CONGRESS.—It is the sense of Congress that—

(1) the Government of the People’s Republic of China is exporting its model for internal security and state control of society through advanced technology and artificial intelligence; and

(2) the inclusion of communication networks and communications supply chains with equipment and services from companies with close ties to or that are susceptible to pressure from governments or security services without reliable legal checks on governmental powers can lead to breaches of citizens’ private information, increased censorship, violations of human rights, and harassment of political opponents.

(b) DIPLOMATIC ENGAGEMENT.—The Secretary of State shall conduct diplomatic engagement with govern-
ments and civil society organizations in Latin America and
the Caribbean to—

(1) help identify and mitigate the risks to civil
liberties posed by technologies and services described
in subsection (a); and

(2) offer recommendations on ways to mitigate
such risks.

(c) Internet Freedom Programs.—The Chief Exec-
utive Officer of the United States Agency for Global
Media, who may work through the Open Technology Fund
of the Agency, and the Secretary of State, working
through the Bureau of Democracy, Human Rights, and
Labor’s Internet Freedom and Business and Human
Rights Section, shall expand and prioritize efforts to pro-
vide anti-censorship technology and services to journalists
in Latin America and the Caribbean, in order to enhance
their ability to safely access or share digital news and in-
formation.

SEC. 30250. CARIBBEAN ENERGY INITIATIVE AS ALTERNATIVE TO CHINA’S BELT AND ROAD INITIATIVE.

(a) FINDINGS.—Congress makes the following find-
ings:

(1) The countries of the Caribbean are heavily reliant upon imported oil to provide for approximately 90 percent of their energy production.

(2) The level of dependence is even higher including—

(A) Jamaica, which relies on oil for 95.9 percent of its electricity;

(B) Barbados, which relies on oil for 96 percent of its electricity;

(C) The Virgin Islands, which relies on oil for nearly 100 percent of its electricity; and
(D) St. Lucia, which relies on oil for 100 percent of its electricity.

(3) Overreliance on imported fossil fuels has had a detrimental effect on economic development, growth, and competitiveness in the Caribbean.

(4) Since 1970, more than 80 percent of Caribbean coral reefs have been lost due to coastal development and pollution. Soot particulates and climate change caused by burning fossil fuels have seriously damaged coral reefs, which are a significant source of tourism dollars, fishing, biodiversity, and natural beauty.

(5) Air pollution caused by burning oil for electricity—

(A) has serious health impacts in the form of higher rates of asthma and other lung ailments; and

(B) can also exacerbate climate change.

(6) The Caribbean region is particularly vulnerable to sea level rise and stronger storms.

(7) Between 2005 and 2018, the dependence of the countries of the Caribbean on oil was perpetuated by the Venezuelan-led Petrocaribe oil alliance, which—
(A) offered preferential terms for oil sales; and
(B) supplies some countries with up to 40 percent of their energy production needs.

(8) The ongoing domestic economic crisis and political turmoil in Venezuela has forced the Government of Venezuela to retract its commitments to the Petrocaribe oil alliance and step away as a regional power. Only Cuba still receives preferential Petrocaribe pricing on fuel exports from Venezuela, while other Petrocaribe member countries are experiencing a destabilized flow of oil.

(9) China has spent more than $244,000,000,000 on energy projects worldwide since 2000, 25 percent of which was spent in Latin America and the Caribbean. Although the majority of this spending was for oil, gas, and coal, China has also been the largest investor in clean energy globally for almost a decade.

(10) The World Bank estimates that the Caribbean will need $12,000,000,000 in power investments through 2035.

(11) Renewable energy technology costs have decreased dramatically in recent years, offering a more viable economic alternative for energy produc-
tion. Solar energy prices have fallen by 80 percent since 2008, causing significant market growth, and according to data released by the International Renewable Energy Agency, 1/3 of global power capacity is based in renewable energy.

(12) In 2016, the International Monetary Fund estimated that transportation accounted for 36 percent of the total primary energy consumed in the Caribbean subregion.

(13) According to the United Nations Environment Programme, Latin America and the Caribbean could achieve annual savings of $621,000,000,000 and a reduction of 1,100,000,000 tons of CO2 by 2050 if the region’s energy and transport sectors reach net zero emissions.

(14) The Caribbean has an abundance of onshore and offshore resources needed for renewable energy, including sun, wind, geothermal, and some hydropower production capacity.

(15) The United States Government is deeply engaged in providing technical and policy assistance to countries of the Caribbean on energy issues through—

(A) the Energy and Climate Partnership of the Americas;
(B) Connecting the Americas 2022; and

(C) bilateral assistance programs.

(16) On February 19, 2014, at the North American Leaders’ Summit, President Barack Obama, Prime Minister Stephen Harper of Canada, and President Enrique Peña Nieto of Mexico reaffirmed their commitment to bring affordable, reliable, and increasingly renewable power to the Caribbean, while opening wider markets for clean energy and green technology.

(17) On June 19, 2015, President Barack Obama announced the Caribbean Energy Security Initiative, which would partner with individual countries—

(A) to transform its energy sector;

(B) to work to increase access to finance, good governance, and diversification; and

(C) to maximize the impact of existing donor effects.

(18) On May 4, 2016, at the United States-Caribbean-Central American Energy Summit, the energy security task force formally launched the Caribbean Sustainable Energy Roadmap and Strategy (C–SERMS) as a mechanism to manage regional coordination and action on energy security
and agreed to expand the regional market and transmission system.

(19) The United States has an important opportunity—

(A) to deepen this engagement;

(B) to work as a partner with Caribbean countries on a more regional and coordinated basis;

(C) to help ease the region’s dependence on imported oil; and

(D) to promote affordable alternative sources of energy.

(b) DEFINITIONS.—In this section:

(1) CARIBBEAN COUNTRIES.—The term “Caribbean countries” means countries in the Caribbean region, but does not include Cuba or Venezuela.

(2) CARIBBEAN GOVERNMENTS.—The term “Caribbean governments” means the national governments of the Caribbean countries.

(c) STATEMENT OF POLICY.—It is the policy of the United States to help Caribbean countries—

(1) achieve greater energy security and improve domestic energy resource mobilization;

(2) lower their dependence on imported fuels;
(3) eliminate the use of diesel, heavy fuel oil, other petroleum products, and coal for the generation of electricity;

(4) increase production of renewable energy; and

(5) meet the greenhouse gas mitigation goals of their national determined contributions to the Paris Agreement.

(d) STRATEGY.—

(1) SUBMISSION.—Not later than 120 days after the date of the enactment of this Act, the Secretary of State, in coordination with the Administrator of the United States Agency for International Development (USAID), shall submit to the appropriate congressional committees a multi-year strategy that describes how the Department of State will promote regional cooperation with Caribbean countries—

(A) to lower dependence on imported fuels, grow domestic clean energy production in the region, strengthen regional energy security, and lower energy sector greenhouse gas emissions;

(B) to decrease dependence on oil in the transportation sector;
(C) to increase energy efficiency, energy conservation, and investment in alternatives to imported fuels;

(D) to improve grid reliability and modernize electricity transmission networks;

(E) to advance deployment of innovative solutions to expand community and individuals’ access to electricity;

(F) to help reform energy markets to encourage good regulatory governance and to promote a climate of private sector investment; and

(G) to mitigate greenhouse gas emissions from the energy and transportation sector.

(2) ELEMENTS.—The strategy required under subsection (a) shall include—

(A) a thorough review and inventory of United States Government activities that are being carried out bilaterally, regionally, and in coordination with multilateral institutions—

(i) to promote energy and climate security in the Caribbean region; and

(ii) to reduce the region’s reliance on oil for electricity generation;

(B) opportunities for marshaling regional cooperation—
(i) to overcome market barriers resulting from the small size of Caribbean energy markets;

(ii) to address the high transportation and infrastructure costs faced by Caribbean countries;

(iii) to ensure greater donor coordination between governments, multilateral institutions, multilateral banks, and private investors; and

(iv) to expand regional financing opportunities to allow for lower cost energy entrepreneurship;

(C) measures to ensure that each Caribbean government has—

(i) an independent utility regulator or equivalent;

(ii) affordable access by third party investors to its electrical grid with minimal regulatory interference;

(iii) effective energy efficiency and energy conservation;

(iv) programs to address technical and nontechnical issues;
(v) a plan to eliminate major market distortions; and

(vi) other taxes on clean energy solutions; and

(D) recommendations for how United States policy, technical, and economic assistance can be used in the Caribbean region—

(i) to advance renewable energy development and the incorporation of renewable technologies into existing energy grids and the development and deployment of microgrids where appropriate and feasible to boost energy security and reliability, particularly to underserved communities;

(ii) to increase the generation of clean energy sufficiently to replace and allow for the retirement of obsolete fossil fuel energy generation units in Caribbean countries;

(iii) to create regional financing opportunities to allow for lower cost energy entrepreneurship;

(iv) to deploy transaction advisors in the region to help attract private investment and break down any market or regulatory barriers; and
(v) to establish a mechanism for each host government to have access to independent legal advice—

(I) to speed the development of energy-related contracts; and

(II) to better protect the interests of Caribbean governments and citizens.

(3) CONSULTATION.—In devising the strategy under this subsection, the Secretary of State shall work with the Secretary of Energy and shall consult with—

(A) the Secretary of the Interior;

(B) the Secretary of Commerce;

(C) the Secretary of the Treasury;

(D) the Board of Directors of the Export-Import Bank of the United States;

(E) the Board of Directors of the Development Finance Corporation;

(F) the Administrator of the United States Agency for International Development;

(G) the Caribbean governments;

(H) the Inter-American Development Bank;

(I) the World Bank Group; and
(1) The United States shares with the Caribbean a collective vulnerability to natural disasters, which affects the lives and the economies of our citizens.

(2) The April 9, 2021, eruption of the La Soufriere volcano is another reminder of the devastation caused by the many natural disasters the Caribbean confronts each year and the region’s vulnerability to external shocks. Hurricane Dorian, the largest storm to hit the region, wiped out large parts of the northern Bahamas in 2019, and Hurricanes Maria and Irma devastated multiple islands across the region in 2017, including Puerto Rico. According to IMF research, of the 511 plus disasters worldwide to hit small states since 1950, around two-thirds (324) have been in the Caribbean.

(3) This region is seven times more likely to experience a natural disaster than elsewhere. And,
when one occurs, it will incur as much as six times more damage.

(4) Extreme weather events and other environmental impacts will only worsen over the coming years, and if not addressed, we will see only increasing economic shocks on these countries, driving irregular migration.

(5) While the United States has considerable expertise and capacity in assisting countries with disaster response, there remains a need for stronger partnerships that build regional resilience through efficient and interoperable platforms, protecting people and speeding recovery.

(6) The People’s Republic of China has dramatically increased its engagement in the Caribbean in the past five years, including offering loans and grants related to disaster response and resilience and sought to acquire property rights in the Caribbean that would be detrimental to United States national security interests.

(7) In 2019, the United States launched a new U.S.-Caribbean Resilience Partnership to deepen cooperation and investment to strengthen our disaster resilience throughout the Caribbean region, including—
(A) to streamline early warning response networks and formalize communication channels;

(B) to enhance, encourage, and work collaboratively on further developing aviation disaster resilience plans and partnerships;

(C) to prioritize regional technical exchange in energy planning, risk reduction, and resilience;

(D) to increase communications network interoperability between Caribbean partners and the United States;

(E) to utilize storm surge mapping data and share real-time information in preparation for potential damage resulting from tropical cyclones and tsunamis;

(F) to use meteorological services to strengthen and deepen physical and communications infrastructure, data collection networks, and human and technical capacity throughout the region, as well as interactions with the public;

(G) to understand that while the use of international and military and civil defense assets in disaster response may only be considered...
as a last resort, when local, national, and international civilian capabilities are overwhelmed, civil-military coordination should occur, in support of the affected nation;

(H) to develop a framework that would govern the deployment of international military and civil defense assets in disaster response when local, national, and international civilian capabilities are overwhelmed, in support of the affected nation;

(I) to seek common mechanisms for ensuring rapid disaster response and recovery, including waiving or expediting diplomatic clearances, waiving of or reducing customs fees, streamlining overflight and airspace clearance, and ensuring that the first responders have the ability to rapidly respond to disasters in other countries;

(J) to promote the integration and coordination of regional response mechanisms in the Caribbean, including through the Caribbean Disaster Emergency Management Agency, the Regional Security System, United States Government Agencies, and allies in ways that facilitate more effective and efficient planning, miti-
gation, response, and resilience to natural disas-
ters;

(K) to share best practices in improved
building codes with national disaster organiza-
tions, including building better programs, at re-

gional, national and community levels; and

(L) to promote community-based disaster
preparedness and mitigation activities, particu-
larly in underserved communities, with the aim
of increasing broad public participation and re-
silience.

(b) POLICY.—It is the policy of the United States to
help Caribbean countries—

(1) increase their resilience and adapt to nat-
ural disasters and the impacts of severe weather
events and a changing environment;

(2) partner with United States Federal, State,
and local agencies and engage in technical coopera-
tion, dialogue, and assistance activities;

(3) harmonize standards and practices related
to paragraphs (1) and (2) to promote increased in-
vestment and integration;

(4) increase investment from United States
companies in the Caribbean on resilience-building,
adaptation, and climate-related mitigation efforts;
(5) promote regional cooperation and ensure efforts by the United States, Caribbean countries, and international partners complement each other; and

(6) further assist with the efforts described in subsection (a)(7).

(c) Strategy.—Not later than 180 days after the date of the enactment of this Act, the Secretary of State, in coordination with the heads of other Federal departments and agencies, shall submit to the appropriate congressional committees a multi-year strategy that describes how the Department of State will achieve the policies described in subsection (b).

(d) Authorization of Appropriations.—There are authorized to be appropriated for activities, programs, technical assistance, and engagement under this section the following:

(1) $20,000,000 for fiscal year 2022.

(2) $25,000,000 for fiscal year 2023.

(3) $30,000,000 for fiscal year 2024 and each fiscal year thereafter.

(e) Reporting and Monitoring.—

(1) In general.—Of the amounts authorized to be appropriated each fiscal year pursuant to subsection (d), at least five percent of all programming funding allocation shall support and be directed to—
ward reporting, monitoring, and assessment of effectiveness.

(2) ENGAGEMENT AND COLLABORATION.—The Department of State shall ensure that at least 20 percent of amounts authorized to be appropriated pursuant to subsection (d) directly support the training of, engagement with, collaboration with, and exchange of expertise on resilience between United States Federal, State, and local officials and their Caribbean government counterparts. Such amounts should also support, as appropriate, increased academic, civil society, media, and private sector engagement in the fields of resilience-building, adaptation, and mitigation.

SEC. 30252. COUNTERING CHINA’S EDUCATIONAL AND CULTURAL DIPLOMACY IN LATIN AMERICA.

(a) FINDINGS.—Congress finds the following:

(1) According to a report by the National Endowment for Democracy, China has spent the equivalent of billions of dollars to shape public opinion and perceptions around the world through thousands of people-to-people exchanges, cultural activities, educational programs, and the development of media enterprises and information initiatives with global reach.
(2) Educational and exchange programs are a core element of United States public diplomacy, elevating our culture, policies, and interests worldwide.

(3) These programs provide students with access to international knowledge, an opportunity to learn foreign languages, and a unique environment for developing cultural understanding, all of which are valuable skills in today’s global economy.

(4) 90 percent of ECA’s appropriation is spent in the United States or invested directly in American citizens or American organizations.

(b) SENSE OF CONGRESS.—It is the sense of Congress that—

(1) China’s efforts to mold public opinion and influence educational institutions undermine United States’ influence in Latin America and the Caribbean and threaten democratic institutions and practices in the region;

(2) the United States Government should expand current educational and cultural exchange programs in Latin America and the Caribbean, which are cost-effective and strengthen people-to-people diplomacy, to promote national security and foreign policy interests of the United States; and
(3) educational exchanges foster linguistic, cultural, and educational skills that advance United States economic competitiveness, strengthen alliances, and support democracies worldwide.

(c) STRATEGY.—Not later than 180 days after the date of the enactment of this Act, the Secretary of State, acting through the Assistant Secretary of State for Educational and Cultural Affairs, and in coordination with the Assistant Administrator for the Bureau of Economic Growth, Education, and Environment at the United States Agency for International Development, shall devise a strategy—

(1) to evaluate and expand existing programs and, as necessary, design and implement new educational, professional, and cultural exchanges and other programs to—

(A) create and sustain mutual understanding with other countries necessary to advance United States foreign policy goals by cultivating people-to-people ties among current and future global leaders that build enduring networks and personal relationships; and

(B) promote United States national security interests and values, including through the expansion of exchange visitor programs such as
international visitor leadership programs and
the Young Leaders of the Americas Initiative,
as well as professional capacity building pro-
grams that prioritize building skills in entrepre-
neurship, promoting transparency, and tech-
nology;

(2) to ensure that exchange programs for
Americans abroad and international visitors attract
a diverse pool of participants, including from under-
represented, marginalized, and low-income commu-
nities; and

(3) to evaluate, expand, and strengthen existing
programs, and, as necessary, design and implement
new basic and higher education programs in Latin
America and the Caribbean, in accordance with the
United States Strategy on International Basic Edu-
cation and the United States Agency for Inter-
national Development Education Policy, to enable all
young adults, youth, and children to acquire the
quality education and skills needed to be productive
members in society, which will lead to better indi-
vidual and societal outcomes.

(d) REPORT WITH INTELLIGENCE ASSESSMENT.—
Not later than 180 days after the date of the enactment
of this Act, the Secretary of State shall, in coordination
with the Director of National Intelligence, submit to the appropriate congressional committees (including the Permanent Select Committee on Intelligence of the House of Representatives and the Select Committee on Intelligence of the Senate) a report that assesses the nature and impact of the People’s Republic of China’s educational and cultural sector activity in Latin America and the Caribbean, its impact on United States’ strategic interests, and recommendations for the United States Government to expand people-to-people ties.

SEC. 30253. NARCOTICS TRAFFICKING IN LATIN AMERICA AND THE CARIBBEAN.

It is the sense of Congress that—

(1) narcotics trafficking continues to pose a security threat to the countries and peoples of Latin America and the Caribbean;

(2) other forms of transnational organized crime, including arms trafficking, human smuggling, money laundering, and illicit financing, are drivers of irregular migration;

(3) narcotics trafficking is fueled by governments that fail to curb the illicit drug trade by adequately regulating the legal trade of non-fentanyl opioids and precursor chemicals used to produce
fentanyl, fentanyl analogs, and other synthetic drugs;

(4) further, governments that do not cooperate sufficiently on financial investigations and prosecutions, withhold information with respect to money laundering crimes, or are determined to facilitate illicit activities, particularly by transnational organized criminal organizations, should be held accountable;

(5) as noted in the International Narcotics Control Strategy Report 2020, China “has not cooperated sufficiently on financial investigations and does not provide adequate responses to requests for financial investigation information”; 

(6) the United States should apply economic and other targeted financial sanctions with respect to individuals engaged in financial crimes and money laundering that fosters narcotics trafficking in the countries of Latin America and the Caribbean; and 

(7) the United States should look to policies to hold accountable countries that fail to sufficiently investigate financial crimes and money laundering that foster narcotics trafficking in the countries of Latin America and the Caribbean.
SEC. 30254. REPORT ON MAJOR CHINESE INFRASTRUCTURE INVESTMENTS.

Not later than 180 days after the date of the enactment of this Act, the Secretary of State shall submit to Congress a report on major Chinese infrastructure investments in Latin America and the Caribbean and the extent to which the countries that host these investments are able to meet the interest and principal payments associated with any outstanding loans.

PART 2—TRANSATLANTIC RELATIONSHIPS

SEC. 30255. SENSE OF CONGRESS ON TRANSATLANTIC RELATIONSHIPS.

It is the sense of Congress that—

(1) the United States, the European Union, the United Kingdom, and other European countries are close partners, sharing values grounded in democracy, human rights, transparency, and the rules-based international order established after World War II;

(2) without a common approach by the United States, the European Union, the United Kingdom, and other European countries on connectivity, transnational challenges, and support for democracy and human rights, the People’s Republic of China will continue to increase its economic, political, and security leverage in Europe and globally;
(3) the People’s Republic of China’s deployment of assistance to European countries following the COVID–19 outbreak showcased a coercive approach to aid, but it also highlighted Europe’s deep economic ties to the People’s Republic of China;

(4) as European countries seek to recover from the economic toll of the COVID–19 outbreak, the United States must stand in partnership with Europe to support our collective economic recovery, reinforce our collective national security, and defend shared values;

(5) the United States, the European Union, the United Kingdom, and other European countries should coordinate on joint strategies to diversify reliance on supply chains away from the People’s Republic of China, especially in the medical and pharmaceutical sectors;

(6) the United States, the European Union, the United Kingdom, and other European countries should leverage their respective economic innovation capabilities to support the global economic recovery from the COVID–19 recession and draw a contrast with the centralized economy of the People’s Republic of China;
(7) the United States, the European Union, Japan, and other like-minded countries should continue efforts to address the security, economic, democracy, and human rights challenges posed by the People’s Republic of China;

(8) the United States, the European Union, the United Kingdom, and other European countries should enhance cooperation to counter People’s Republic of China disinformation, influence operations, and propaganda efforts;

(9) the United States and Europe share serious concerns with the repressions being supported and executed by the Government of the People’s Republic of China, and should continue implementing measures to address the Government of the People’s Republic of China’s specific abuses in Tibet, Hong Kong, and Xinjiang, and should build joint mechanisms and programs to prevent the export of China’s authoritarian governance model to countries around the world;

(10) the United States and Europe should remain united in their shared values against attempts by the Government of the People’s Republic of China at the United Nations and other multilateral organizations to promote efforts that erode the Uni-
versal Declaration of Human Rights, like the “com-
munity of a shared future for mankind” and “de-
mocratization of international relations”;

(11) the People’s Republic of China’s infra-
structure investments around the world, particularly
in 5G telecommunications technology and port infra-
structure, could threaten democracy across Europe
and the national security of key countries;

(12) as appropriate, the United States should
share intelligence with European allies and partners
on Huawei’s 5G capabilities and the intentions of
the Government of the People’s Republic of China
with respect to 5G expansion in Europe;

(13) the European Union’s Investment Screen-
ing Regulation, which came into force in October
2020, is a welcome development, and member states
should closely scrutinize PRC investments in their
countries through their own national investment
screening measures;

(14) the President should actively engage the
European Union on the implementation of the Ex-
port Control Reform Act regulations and to better
harmonize United States and European Union poli-
cies with respect to export controls;
(15) the President should strongly advocate for
the listing of more items and technologies to restrict
dual use exports controlled at the National Security
and above level to the People’s Republic of China
under the Wassenaar Arrangement;

(16) the United States should explore the value
of establishing a body akin to the Coordinating
Committee for Multilateral Export Controls
(CoCom) that would specifically coordinate United
States and European Union export control policies
with respect to limiting exports of sensitive tech-
nologies to the People’s Republic of China; and

(17) the United States should work with coun-
terparts in Europe to—

(A) evaluate United States and European

(10) SUNSET.—The requirements of this section shall terminate on the date that is 5 years after the date of the enactment of this Act.

SEC. 30275. AFRICA BROADCASTING NETWORKS.

Not later than 180 days after the date of the enactment of this Act, the Chief Executive Officer of the United States Agency for Global Media shall submit to the appropriate congressional committees a report on the resources and timeline needed to establish within the Agency an organization the mission of which shall be to promote democratic values and institutions in Africa by providing objective, accurate, and relevant news and information to the people of Africa and counter disinformation from malign actors, especially in countries in which a free press is
banned by the government or not fully established, about
the region, the world, and the United States through un-
censored news, responsible discussion, and open debate.

SEC. 30276. AFRICA ENERGY SECURITY AND DIVERSIFICA-
TION.

(a) STATEMENT OF POLICY.—It is the policy of the
United States to support increased access to energy in Af-
rica and reduce Africa’s energy dependence on countries
that use energy reliance for undue political influence such
as the Russian Federation and the People’s Republic of
China.

(b) FINDINGS.—Congress finds the following:

(1) Lack of access to energy remains a signifi-
cant barrier to economic advancement and oppor-
tunity in Africa. As of 2018, an estimated
789,000,000 people, the vast majority of them in
sub-Saharan Africa, lacked access to any modern
electricity. Even in the region’s most advanced
economies, average annual per capita electricity con-
sumption is often under 200 kilowatt-hours, less
than what is needed to power a typical refrigerator.
Only a small fraction of the 12,000,000 young Afri-
cans who enter the job market each year find em-
ployment; and the cost and reliability of electricity
remain top constraints to job creation and economic competitiveness.

(2) The United States’ global strategic competitors have stepped in to address this disparity and finance energy sector development across Africa. China is the single largest trading partner for African countries in aggregate, and the largest bilateral lender for public sector loans across Africa. Approximately 65 percent of Chinese lending to Africa goes to infrastructure, and between 2013–2020, the energy sector consistently accounted for the largest share of all investment under China’s Belt and Road Initiative.

(3) Reliable, affordable, and sustainable power is the foundation for all modern economies and necessary for increasing growth and employment.

(4) Increasing energy supply in low- and lower middle-income countries is necessary in the next decades in order to meet human, social, security, and economic needs.

(5) Addressing energy poverty, powering inclusive economies, and making energy systems resilient in low- and lower middle-income countries will require diversified power systems and a mix of tech-
(c) SENSE OF CONGRESS.—It is the sense of Congress that countries in Africa continue to be important partners to the United States and the DFC should continue to make investments in sub-Saharan Africa to facilitate technologies that contribute to energy security and reliable, affordable, and sustainable power in low and lower middle-income countries.

(d) AMENDMENT.—Section 3 of the Electrify Africa Act of 2015 (Public Law 114–121; 22 U.S.C. 2293 note) is amended—

(1) in paragraph (8), by striking “and” at the end;

(2) in paragraph (9), by striking the period and inserting a semicolon; and

(3) by inserting after paragraph (9) the following:

“(10) advance United States foreign policy and development goals by assisting African countries to reduce their dependence on energy resources from countries that use energy dependence for undue political influence, such as the Russian Federation or the People’s Republic of China, which have used en-
ergy and financial resources to influence other coun-
tries;

“(11) promote the energy security of allies and
partners of the United States by encouraging the de-
velopment of accessible, transparent, and competitive
energy markets that provide diversified sources and
reliable, affordable, and sustainable power;

“(12) encourage United States public and pri-
ivate sector investment in African energy infrastruc-
ture projects to bridge the gap between energy secu-
rity requirements and commercial demand in a way
that is consistent with the region’s capacity; and

“(13) help facilitate the export of United States
energy resources, technology, and expertise to global
markets in a way that benefits the energy security
of allies and partners of the United States, including
in Africa.”

PART 5—MIDDLE EAST AND NORTH AFRICA

SEC. 30281. STRATEGY TO COUNTER CHINESE INFLUENCE
IN, AND ACCESS TO, THE MIDDLE EAST AND
NORTH AFRICA.

(a) SENSE OF CONGRESS.—It is the sense of Con-
gress that—

(1) the People’s Republic of China is upgrading
its influence in the Middle East and North Africa
through its energy and infrastructure investments, technology transfer, and arms sales;

(2) the People’s Republic of China seeks to establish military or dual use facilities in geographically strategic locations in the Middle East and North Africa to further its Belt and Road Initiative at the expense of United States national security interests; and

(3) the export of certain communications infrastructure from the People’s Republic of China degrades the security of partner networks, exposes intellectual property to theft, threatens the ability of the United States to conduct security cooperation with compromised regional partners, and furthers China’s authoritarian surveillance model.

(b) STRATEGY REQUIRED.—

(1) IN GENERAL.—Not later than 180 days after the date of the enactment of this Act, the Secretary of State, in coordination with the Secretary of Defense, the Administrator of the United States Agency for International Development, and the heads of other appropriate Federal agencies, shall jointly develop and submit to the appropriate congressional committees and the Committees on Armed Services of the Senate and the House of Representa-

(C) efforts to improve regional cooperation through foreign military sales, financing, and efforts to build partner capacity and increase interoperability with the United States;

(D) an assessment of the People’s Republic of China’s joint research and development with the Middle East and North Africa, impacts on the United States’ national security interests, and recommended steps to mitigate the People’s Republic of China’s influence in such area;

(F) an assessment of the People’s Republic of China’s military sales to the region, including lethal and non-lethal unmanned aerial systems;

(G) an assessment of People’s Republic of China military basing and dual-use facility initiatives across the Middle East and North Africa, impacts on United States’ national security interests, and recommended steps to mitigate the People’s Republic of China’s influence in such area;

(H) efforts to improve regional security cooperation with United States allies and partners with a focus on—

(i) maritime security in the Arabian Gulf, the Red Sea, and the Eastern Mediterranean;

(ii) integrated air and missile defense;

(iii) cyber security;
(iv) border security; and

(v) critical infrastructure security, to include energy security;

(I) increased support for government-to-government engagement on critical infrastructure development projects, including ports and water infrastructure;

(J) efforts to encourage United States private sector and public-private partnerships in healthcare technology and foreign direct investment in non-energy sectors;

(K) efforts to expand youth engagement and professional education exchanges with key partner countries;

(L) specific steps to counter increased investment from the People’s Republic of China in telecommunications infrastructure and diplomatic efforts to stress the political, economic, and social benefits of a free and open internet;

(M) efforts to promote United States private sector engagement in and public-private partnerships on renewable energy development;

(N) the expansion of public-private partnership efforts on water, desalination, and irrigation projects;
(O) efforts to warn United States partners in the Middle East and North Africa of the risks associated with the People’s Republic of China’s telecommunications infrastructure and provide alternative “clean paths” to the People’s Republic of China’s technology; and

(P) opportunities of potential partnership with Israel and other regional nations in areas such as technological cooperation in areas critical to national security.

(c) Form.—The strategy required under section (b) shall be submitted in an unclassified form that can be made available to the public, but may include a classified annex as necessary.

SEC. 30282. SENSE OF CONGRESS ON MIDDLE EAST AND NORTH AFRICA ENGAGEMENT.

(a) Findings.—Congress makes the following findings:

(1) The United States and the international community have long-term interests in the stability, security, and prosperity of the people of the Middle East and North Africa.

(2) In addition to and apart from military and security efforts, the United States should harness a whole of government approach, including bilateral
and multilateral statecraft, economic lines of effort, and public diplomacy to compete with and counter PRC influence.

(3) A clearly articulated positive narrative of United States engagement, transparent governance structures, and active civil society engagement help counter predatory foreign investment and influence efforts.

(b) Statement of Policy.—It is the policy of the United States that the United States and the international community should continue diplomatic and economic efforts throughout the Middle East and North Africa that support reform efforts to—

(1) promote greater economic opportunity;
(2) foster private sector development;
(3) strengthen civil society;
(4) promote transparent and democratic governance and the rule of law; and
(5) promote greater regional integration and intraregional cooperation, including with Israel.

SEC. 30283. SENSE OF CONGRESS ON PEOPLE’S REPUBLIC OF CHINA-IRAN RELATIONSHIP.

mines United States efforts to compel Iran to abandon its malign activities.

PART 6—ARCTIC REGION

SEC. 30285. ARCTIC DIPLOMACY.

(a) SENSE OF CONGRESS ON ARCTIC SECURITY.—

(E) threatens the health of the Arctic’s fragile and pristine environment and the unique
and highly sensitive species found in the Arctic’s marine and terrestrial ecosystems; and

(2) the United States should reduce the consequences described in paragraph (1) by—

(A) evaluating the wide variety and dynamic set of security and safety risks developing in the Arctic;

PART 8—PACIFIC ISLANDS

SEC. 30295. SHORT TITLE.
This part may be cited as the “Boosting Long-term U.S. Engagement in the Pacific Act” or the “BLUE Pacific Act”.

SEC. 30296. FINDINGS.
Congress finds the following:

(1) The Pacific Islands—

(A) are home to roughly 10 million residents, including over 8.6 million in Papua New Guinea, constituting diverse and dynamic cultures and peoples;

(B) are spread across an expanse of the Pacific Ocean equivalent to 15 percent of the Earth’s surface, including the three sub-regions of Melanesia, Micronesia, and Polynesia; and

(C) face shared challenges in development that have distinct local contexts, including climate change and rising sea levels, geographic distances from major markets, and vulnerability to external shocks such as natural disasters.

(2) The United States is a Pacific country with longstanding ties and shared values and interests with the Pacific Islands, including through the Compacts of Free Association with the Freely Associated States, the Republic of the Marshall Islands, the

(3) The United States has vital national security interests in the Pacific Islands, including—

(A) protecting regional peace and security that fully respects the sovereignty of all nations;

(B) advancing economic prosperity free from coercion through sustainable development; and

(C) supporting democracy, good governance, the rule of law, and human rights and fundamental freedoms.

(4) Successive United States administrations have recognized the importance of the Pacific region, including the Pacific Islands, in high-level strategic documents, including the following:

(A) The 2015 National Security Strategy, which first declared the rebalance to Asia and the Pacific, affirmed the United States as a Pacific nation, and paved the way for subsequent United States engagement with the Pacific Islands, including several new policies focused on conservation and resilience to climate change announced in September 2016.
(B) The 2017 National Security Strategy, which includes a commitment to “shore up fragile partner states in the Pacific Islands region to reduce their vulnerability to economic fluctuations and natural disasters”.

(C) The 2019 Indo-Pacific Strategy Report, which identified the Pacific Islands as “critical to U.S. strategy because of our shared values, interests, and commitments” and committed the United States to “building capacity and resilience to address maritime security; Illegal, Unreported, and Unregulated fishing; drug trafficking; and resilience to address climate change and disaster response”.

(5) The United States has deepened its diplomatic engagement with the Pacific Islands through several recent initiatives, including—

(A) the Pacific Pledge, which provided an additional $100,000,000 in 2019 and $200,000,000 in 2020, on top of the approximately $350,000,000 that the United States provides annually to the region to support shared priorities in economic and human development, climate change, and more; and
(B) the Small and Less Populous Island Economies (SALPIE) Initiative launched in March 2021 to strengthen United States collaboration with island countries and territories, including in the Pacific Islands, on COVID–19 economic challenges, long-term economic development, climate change, and other shared interests.

(6) The Boe Declaration on Regional Security, signed by leaders of the Pacific Islands Forum in 2018, affirmed that climate change “remains the single greatest threat to the livelihoods, security, and wellbeing of the peoples of the Pacific” and asserted “the sovereign right of every Member to conduct its national affairs free of external interference and coercion”.

(7) The Asian Development Bank has estimated that the Pacific Islands region needs upwards of $2.8 billion a year in investment needs through 2030, in addition to $300 million a year for climate mitigation and adaptation over the same period.

(8) The Pacific Islands swiftly enacted effective policies to prevent and contain the spread of the Coronavirus Disease 2019 (commonly referred to as “COVID–19”) pandemic to their populations. The
United States has provided over $130,000,000 in assistance to the Pacific Islands for their COVID–19 response. However, priorities must be met to ensure continued success in preventing the spread of the COVID–19 pandemic, achieving swift and widespread vaccinations, and pursuing long-term economic recovery in the Pacific Islands, including through—

(A) expanding testing capacity and acquisition of needed medical supplies, including available COVID–19 vaccines and supporting vaccination efforts, through a reliable supply chain;

(B) planning for lifting of lockdowns and reopening of economic and social activities; and

(C) mitigating and recovering from the impacts of the COVID–19 pandemic on the health system and the reliance on food and energy imports as well as lost tourism revenue and other economic and food security damages caused by the pandemic.

(9) Since 1966, thousands of Peace Corps volunteers have proudly served in the Pacific Islands, building strong people-to-people relationships and demonstrating the United States commitment to peace and development in the region. Prior to the
COVID–19 pandemic, the Peace Corps maintained presence in four countries of the Pacific Islands. Peace Corps volunteers continue to be in high demand in the Pacific Islands and have been requested across the region.

and through responsible stewardship of natural resources;

(D) improves civil society, strengthens democratic governance and the rule of law, and promotes human rights and the preservation of the region’s unique cultural heritages;

(E) assists the Pacific Islands in preventing and containing the spread of the COVID–19 pandemic and in pursuing long-term economic recovery; and

(F) supports existing regional architecture and international norms;

(2) to support the vision, values, and objectives of existing regional multilateral institutions and frameworks, such as the Pacific Islands Forum and the Pacific Community, including—

(A) the 2014 Framework for Pacific Regionalism;

(B) the 2018 Boe Declaration on Regional Security; and

(C) the Boe Declaration Action Plan;

(3) to extend and renew the provisions of the Compacts of Free Association and related United States law that will expire in 2023 for the Republic of the Marshall Islands and the Federated States of
Micronesia and in 2024 for the Republic of Palau unless they are extended and renewed; and

(4) to work closely with United States allies and partners with existing relationships and interests in the Pacific Islands, such as Australia, Japan, New Zealand, and Taiwan, in advancing common goals.

SEC. 30298. DEFINITION.

TITLE III—INVESTING IN OUR VALUES

SEC. 30301. SENSE OF CONGRESS ON THE CONTINUED VIOLATION OF RIGHTS AND FREEDOMS OF THE PEOPLE OF HONG KONG.

(a) FINDINGS.—Congress finds the following:

(1) Despite international condemnation, the Government of the People’s Republic of China (“PRC”) continues to disregard its international legal obligations under the Joint Declaration of the Government of the United Kingdom of Great Britain and Northern Ireland and the Government of the People’s Republic of China on the Question of Hong Kong (“Joint Declaration”), in which the PRC committed that—

(A) Hong Kong would enjoy a high degree of autonomy;

(B) for at least 50 years the “social and economic systems in Hong Kong” would remain unchanged; and

(C) the personal rights and freedoms of the people of Hong Kong would be protected by law.

(2) As part of its continued efforts to undermine the established rights of the Hong Kong peo-
ple, the PRC National People’s Congress Standing Committee (“Standing Committee”) passed and imposed upon Hong Kong oppressive and intentionally vague national security legislation on June 30, 2020, that grants Beijing sweeping powers to punish acts of “separating the country, subverting state power, and organizing terroristic activities”.

(3) The legislative process by which the Standing Committee imposed the national security law on Hong Kong bypassed Hong Kong’s local government in a potential violation of the Basic Law of the Hong Kong Special Administrative Region of the People’s Republic of China (“Basic Law”), and involved unusual secrecy, as demonstrated by the fact that the legislation was only the second law since 2008 that the Standing Committee has passed without releasing a draft for public comment.

(4) On July 30, 2020, election officials of the Hong Kong Special Administrative Region (HKSAR) disqualified twelve pro-democracy candidates from participating in the September 6 Legislative Council elections, which were subsequently postponed for a year until September 5, 2021, by citing the public health risk of holding elections during the COVID–19 pandemic.
(5) On July 31, 2020, in an attempt to assert extraterritorial jurisdiction, the HKSAR Government announced indictments of and arrest warrants for six Hong Kong activists living overseas, including United States citizen Samuel Chu, for alleged violations of the national security law.

(6) On November 11, 2020, the HKSAR Government removed four lawmakers from office for allegedly violating the law after the Standing Committee passed additional legislation barring those who promoted or supported Hong Kong independence and refused to acknowledge PRC sovereignty over Hong Kong, or otherwise violates the national security law, from running for or serving in the Legislative Council.

(7) On December 2, 2020, pro-democracy activists Joshua Wong, Agnes Chow, and Ivan Lam were sentenced to prison for participating in 2019 protests.

(8) Ten of the twelve Hong Kong residents (also known as “the Hong Kong 12”) who sought to flee by boat from Hong Kong to Taiwan on August 23, 2020, were taken to mainland China and sentenced on December 30, 2020, to prison terms rang-
ing from seven months to three years for illegal bor-
der crossing.

(9) On December 31, 2020, Hong Kong’s high-
est court revoked bail for Jimmy Lai Chee-Ying, a
pro-democracy figure and publisher, who was
charged on December 12 with colluding with foreign
forces and endangering national security under the
national security legislation.

(10) On January 4, 2021, the Departments of
Justice in Henan and Sichuan province threatened
to revoke the licenses of two lawyers hired to help
the Hong Kong 12.

(11) On January 5, 2021, the Hong Kong Po-
lice Force arrested more than fifty opposition fig-
ures, including pro-democracy officials, activists, and
an American lawyer, for their involvement in an in-
formal July 2020 primary to select candidates for
the general election originally scheduled for Sep-
tember 2020, despite other political parties having
held similar primaries without retribution.

(12) On April 22, 2021, a Hong Kong court
convicted Choy Yuk-ling, a video producer with
Radio Television Hong Kong, in relation to her in-
vestigative reporting on the Hong Kong police.
On June 24, 2021, Apple Daily, Hong Kong’s only surviving pro-democracy newspaper, published its final edition following months of intimidation and repression by the HKSAR Government, including through the arrest of its senior editors, police raids on its offices, and the freezing of its financial assets.

(b) STATEMENT OF CONGRESS.—Congress—

(1) condemns the actions taken by the Government of the People’s Republic of China (“PRC”) and the Government of the Hong Kong Special Administrative Region (“HKSAR”), including the adoption and implementation of national security legislation for Hong Kong through irregular procedures, that violate the rights and freedoms of the people of Hong Kong that are guaranteed by the Joint Declaration and its implementing document, the Basic Law;

(2) reaffirms its support for the people of Hong Kong, who face grave threats to their rights and freedoms;

(3) calls on the Governments of the PRC and HKSAR to—

(A) respect and uphold—
(i) commitments made to the international community and the people of Hong Kong under the Joint Declaration; and

(ii) the judicial independence of the Hong Kong legal system; and

(B) release pro-democracy activists and politicians arrested under the national security law; and

(4) encourages the President, the Secretary of State, and the Secretary of the Treasury to coordinate with allies and partners and continue United States efforts to respond to developments in Hong Kong, including by—

(A) providing protection for Hong Kong residents who fear persecution;

(B) supporting those who may seek to file a case before the International Court of Justice to hold the Government of the PRC accountable for violating its binding legal commitments under the Joint Declaration;

(C) encouraging allies and partner countries to instruct, as appropriate, their respective representatives to the United Nations to use their voice, vote, and influence to press for the
appointment of a United Nations special mandate holder to monitor and report on human rights developments in Hong Kong;

(D) ensuring the private sector, particularly United States companies with economic interests in Hong Kong, is aware of risks the national security legislation poses to the security of United States citizens and to the medium and long-term interest of United States businesses in Hong Kong;

(E) continuing to implement sanctions authorities, especially authorities recently enacted to address actions undermining the rights and freedoms of the Hong Kong people, such as the Hong Kong Autonomy Act (Public Law 116–149) and the Hong Kong Human Rights and Democracy Act of 2019 (Public Law 116–76), with respect to officials of the Chinese Communist Party, the Government of the PRC, or the Government of the HKSAR who are responsible for undermining such rights and freedoms; and

(2) On July 14, 2020, in response to the promulgation of the Hong Kong National Security Law, President Trump signed an Executive order on Hong Kong normalization that, among other policy actions, suspended the special treatment of Hong Kong persons under U.S. law with respect to the issuance of immigrant and nonimmigrant visas.

(3) The United States has a long and proud history as a destination for refugees and asylees fleeing persecution based on race, religion, nationality, political opinion, or membership in a particular social group.

(4) The United States also shares deep social, cultural, and economic ties with the people of Hong Kong, including a shared commitment to democracy, to the rule of law, and to the protection of human rights.
(5) The United States has sheltered, protected, and welcomed individuals who have fled authoritarian regimes, including citizens from the PRC following the violent June 4, 1989, crackdown in Tiananmen Square, deepening ties between the people of the United States and those individuals seeking to contribute to a free, open society founded on democracy, human rights, and the respect for the rule of law.

(6) The United States has reaped enormous economic, cultural, and strategic benefits from welcoming successive generations of scientists, doctors, entrepreneurs, artists, intellectuals, and other freedom-loving people fleeing fascism, communism, violent Islamist extremism, and other repressive ideologies, including in the cases of Nazi Germany, the Soviet Union, and Soviet-controlled Central Europe, Cuba, Vietnam, and Iran.

(7) A major asymmetric advantage of the United States in its long-term strategic competition with the Communist Party of China is the ability of people from every country in the world, irrespective of their race, ethnicity, or religion, to immigrate to the United States and become American citizens.
(c) Statement of Policy.—It is the policy of the United States—

(1) to reaffirm the principles and objectives set forth in the United States-Hong Kong Policy Act of 1992 (Public Law 102–383), specifically that—

(A) the United States has “a strong interest in the continued vitality, prosperity, and stability of Hong Kong”;

(B) “support for democratization is a fundamental principle of United States foreign policy”, and therefore “naturally applies to United States policy toward Hong Kong”; and

(C) “the human rights of the people of Hong Kong are of great importance to the United States and are directly relevant to United States interests in Hong Kong and serve as a basis for Hong Kong’s continued economic prosperity”; and

(D) Hong Kong must remain sufficiently autonomous from the PRC to “justify treatment under a particular law of the United States, or any provision thereof, different from that accorded the People’s Republic of China”;
(2) to continue to support the high degree of
autonomy and fundamental rights and freedoms of
the people of Hong Kong, as enumerated by—
(A) the Joint Declaration;
(B) the International Covenant on Civil
and Political Rights, done at New York, De-
cember 19, 1966; and
(C) the Universal Declaration of Human
Rights, done at Paris, December 10, 1948;
(3) to continue to support the democratic aspi-
risations of the people of Hong Kong, including the
“ultimate aim” of the selection of the Chief Execu-
tive and all members of the Legislative Council by
universal suffrage, as articulated in the Basic Law;
(4) to urge the Government of the PRC, despite
its recent actions, to uphold its commitments to
Hong Kong, including allowing the people of Hong
Kong to govern Hong Kong with a high degree of
autonomy and without undue interference, and en-
suring that Hong Kong voters freely enjoy the right
to elect the Chief Executive and all members of the
Hong Kong Legislative Council by universal suf-
frage;
(5) to support the establishment of a genuine
democratic option to freely and fairly nominate and
elect the Chief Executive of Hong Kong, and the es-
3 tablishment of open and direct democratic elections
for all members of the Hong Kong Legislative Coun-
cil;

(6) to support the robust exercise by residents
of Hong Kong of the rights to free speech, the press,
and other fundamental freedoms, as provided by the
Basic Law, the Joint Declaration, and the Inter-
national Covenant on Civil and Political Rights;

(7) to support freedom from arbitrary or unlaw-
ful arrest, detention, or imprisonment for all Hong
Kong residents, as provided by the Basic Law, the
Joint Declaration, and the International Covenant
on Civil and Political Rights;

(8) to draw international attention to any viola-
tions by the Government of the PRC of the funda-
mental rights of the people of Hong Kong, as pro-
vided by the International Covenant on Civil and Po-

tical Rights, and any encroachment upon the au-
tonomy guaranteed to Hong Kong by the Basic Law
and the Joint Declaration;

(9) to protect United States citizens and long-
term permanent residents living in Hong Kong, as
well as people visiting and transiting through Hong
Kong;
(10) to maintain the economic and cultural ties that provide significant benefits to both the United States and Hong Kong, including the reinstatement of the Fulbright exchange program with regard to Hong Kong at the earliest opportunity;

(11) to coordinate with allies, including the United Kingdom, Australia, Canada, Japan, and the Republic of Korea, to promote democracy and human rights in Hong Kong; and

(12) to welcome and protect in the United States residents of Hong Kong fleeing persecution or otherwise seeking a safe haven from violations by the Government of the PRC of the fundamental rights of the people of Hong Kong.

(d) Temporary Protected Status for Hong Kong Residents in the United States.—

(1) Designation.—

(A) In general.—For purposes of section 244 of the Immigration and Nationality Act (8 U.S.C. 1254a), Hong Kong shall be treated as if it had been designated under subsection (b)(1)(C) of such section, subject to the provisions of this section.

paragraph (A) shall be for the 18-month period beginning on the date of enactment of this Act.

(A) was a permanent resident of Hong Kong at the time such individual arrived into the United States and is a national of the PRC (or in the case of an individual having no nationality, is a person who last habitually resided in Hong Kong);

(B) has been continuously physically present in the United States since the date of the enactment of this Act;

(C) is admissible as an immigrant, except as otherwise provided in paragraph (2)(A) of such section, and is not ineligible for temporary protected status under paragraph (2)(B) of such section; and

(3) CONSENT TO TRAVEL ABROAD.—

(A) IN GENERAL.—The Secretary of Homeland Security shall give prior consent to travel abroad, in accordance with section 244(f)(3) of the Immigration and Nationality Act (8 U.S.C. 1254a(f)(3)), to an alien who is granted temporary protected status pursuant to the designation made under paragraph (1) if the alien establishes to the satisfaction of the Secretary of Homeland Security that emergency and extenuating circumstances beyond the control of the alien require the alien to depart for a brief, temporary trip abroad.

(B) TREATMENT UPON RETURN.—An alien returning to the United States in accordance with an authorization described in subparagraph (A) shall be treated as any other returning alien provided temporary protected status under section 244 of the Immigration and Nationality Act (8 U.S.C. 1254a).

(e) TREATMENT OF HONG KONG RESIDENTS FOR IMMIGRATION PURPOSES.—Notwithstanding any other provision of law, during the five fiscal year period beginning on the first day of the first full fiscal year after the date of enactment of this Act, Hong Kong shall continue
to be considered a foreign state separate and apart from
the PRC as mandated under section 103 of the Immigra-
tion and Nationality Act of 1990 (Public Law 101–649)
for purposes of the numerical limitations on immigrant
visas under sections 201, 202, and 203 of the Immigration
and Nationality Act (8 U.S.C. 1151, 1152, and 1153).

dures for designation of Priority Hong Kong Resi-

State shall finalize such rule not later than one year

(5) PROTECTION FOR REFUGEES.—Nothing in this section may be construed to prevent a Priority Hong Kong Resident from seeking refugee status under section 207 of the Immigration and Nationality Act (8 U.S.C. 1157) or requesting asylum under section 208 of such Act (8 U.S.C. 1158).

(g) REPORTING REQUIREMENTS.—

SEC. 30304. EXPORT PROHIBITION OF MUNITIONS ITEMS TO
THE HONG KONG POLICE FORCE.

Section 3 of the Act entitled “An Act to prohibit the
commercial export of covered munitions items to the Hong
Kong Police Force”, approved November 27, 2019 (Public
Law 116–77; 133 Stat. 1173), is amended by striking “on
December 31, 2021.” and inserting the following: “on the
date on which the President certifies to the appropriate
congressional committees that—

“(1) the Secretary of State has, on or after the
date of the enactment of this paragraph, certified
under section 205 of the United States-Hong Kong

SEC. 30305. SENSE OF CONGRESS ON TREATMENT OF
UYGHURS AND OTHER ETHNIC MINORITIES
IN THE XINJIANG UYGHUR AUTONOMOUS RE-
GION.

(a) FINDINGS.—Congress makes the following find-
ings:

(1) The Uyghurs are one of several predomi-
nantly Muslim Turkic groups living in the Xinjiang
Uyghur Autonomous Region (XUAR) in the north-
west of the People’s Republic of China (PRC).

(2) Following Uyghur demonstrations and un-
est in 2009 and clashes with government security
personnel and other violent incidents in subsequent
years, PRC leaders sought to “stabilize” the XUAR
through large-scale arrests and extreme security
measures, under the pretext of combatting alleged
terrorism, religious extremism, and ethnic sepa-
ratism.

(3) In May 2014, the PRC launched its “Strike
Hard Against Violent Extremism” campaign, which
placed further restrictions on and facilitated addi-
tional human rights violations against minorities in
the XUAR under the pretext of fighting terrorism.
(4) In August 2016, Chinese Communist Party (CCP) Politburo member Chen Quanguo, former Tibet Autonomous Region (TAR) Party Secretary, known for overseeing intensifying security operations and human rights abuses in the TAR, was appointed as Party Secretary of the XUAR.

(5) Beginning in 2017, XUAR authorities have sought to forcibly “assimilate” Uyghurs and other Turkic minorities into Chinese society through a policy of cultural erasure known as “Sinicization”.

(6) Since 2018, credible reporting including from the BBC, France24, and the New York Times has shown that the Government of the PRC has built mass internment camps in the XUAR, which it calls “vocational training” centers, and detained Uyghurs and other groups in them and other facilities.

(7) Since 2015, XUAR authorities have arbitrarily detained an estimated 1,500,000 Uyghurs—12.5 percent of the XUAR’s official Uyghur population of 12,000,000—and a smaller number of other ethnic minorities in the “vocational training” centers and other detention and pre-detention facilities.
(8) In 2017, the XUAR accounted for less than two percent of the PRC’s total population but 21 percent of all arrests in China.

(9) The Atlantic, Radio Free Asia, and other sources have revealed that detainees are forced to renounce many of their Islamic beliefs and customs and repudiate Uyghur culture, language, and identity.

(10) Investigations by Human Rights Watch and other human rights organizations have documented how detainees are subject to political indoctrination, forced labor, crowded and unsanitary conditions, involuntary biometric data collection, both medical neglect and intrusive medical interventions, food and water deprivation, beatings, sexual violence, and torture.

(11) Research by the Australian Strategic Policy Institute suggests that, since late 2019, many detainees have been placed in higher security facilities and convicted of formal crimes.

(12) Human Rights Watch has reported that the PRC uses data collection programs, including facial recognition technology, to surveil Uyghurs in the XUAR and to identify individuals whom authorities may detain.
(13) PRC authorities have placed countless children whose parents are detained or in exile in state-run institutions and boarding schools without the consent of their parents.

(14) New York Times reporting revealed that numerous local PRC officials who did not agree with the policies carried out in XUAR have been fired and imprisoned.

(15) Associated Press reporting documented widespread and systemic efforts by PRC authorities to force Uyghur women to take contraceptives or to subject them to sterilization or abortion, threatening to detain those who do not comply.

(16) PRC authorities prohibit family members and advocates inside and outside China from having regular communications with relatives and friends imprisoned in the XUAR, such as journalist and entrepreneur Ekpar Asat.

(17) PRC authorities have imposed pervasive restrictions on the peaceful practice of Islam in the XUAR, to the extent that Human Rights Watch asserts the PRC “has effectively outlawed the practice of Islam”.

(18) Individuals who are not detained in camps have been forced to attend political indoctrination
sessions, subjected to movement restrictions, mass surveillance systems, involuntary biometric data collection, and other human rights abuses.

(19) International media, nongovernmental organizations, scholars, families, and survivors have reported on the systemic nature of many of these abuses.

(20) On June 26, 2020, a group of 50 independent United Nations experts jointly expressed alarm over China's deteriorating human rights record, including its repression in Xinjiang, and called on the international community “to act collectively and decisively to ensure China respects human rights and abides by its international obligations”.

(21) On October 6, 2020, 39 United Nations member countries issued a public statement condemning human rights violations by PRC authorities and calling on the PRC to allow the United Nations High Commissioner for Human Rights unfettered access to Xinjiang.

(23) The United States Congress passed the Global Magnitsky Human Rights Accountability Act
HR 4521 PCS

(subtitle F of title XII of Public Law 114–328; 22 U.S.C. 2656 note), which has been used to sanction PRC officials and entities for their activities in the XUAR.

(24) The United States Government has implemented additional targeted restrictions on trade with Xinjiang and imposed visa and economic sanctions on PRC officials and entities for their activities in the XUAR.

(25) The United States Government has documented human rights abuses and violations of individual freedoms in the XUAR, including in the 2019 Department of State Report on International Religious Freedom.

(26) On January 19, 2021, during his confirmation hearing, Secretary of State Antony Blinken testified that “forcing men, women, and children into concentration camps, trying to in effect reeducate them to be adherents to the Chinese Communist Party—all of that speaks to an effort to commit genocide”.

(27) On January 19, 2021, Secretary of the Treasury Janet L. Yellen, during her confirmation hearing, publicly stated that China is guilty of “horrendous human rights abuses”.

(28) On January 27, 2021, in response to a question from the press regarding the Uyghurs, Secretary Blinken stated that his “judgement remains that genocide was committed against the Uyghurs”.

(29) On March 10, 2021, in response to a question on Xinjiang during his testimony before the Committee on Foreign Affairs of the House of Representatives, Secretary Blinken reiterated, “We’ve been clear, and I’ve been clear, that I see it as genocide, other egregious abuses of human rights, and we’ll continue to make that clear.”.

(30) The 2020 Department of State Country Reports on Human Rights Practices: China states that “[g]enocide and crimes against humanity occurred during the year against the predominantly Muslim Uyghurs and other ethnic and religious minority groups in Xinjiang”.

(b) SENSE OF CONGRESS.—It is the sense of Congress that—

(1) the atrocities committed by the PRC against Uyghurs and other predominantly Muslim Turkic groups in Xinjiang, including forced labor, sexual violence, the internment of over 1,000,000 individuals, and other horrific abuses must be condemned;
(2) the President, the Secretary of State, and the United States Ambassador to the United Nations should speak publicly about the ongoing human rights abuses in the XUAR, including in formal speeches at the United Nations and other international fora;

(3) the President, the Secretary of State, and the United States Ambassador to the United Nations should appeal to the United Nations Secretary-General to take a more proactive and public stance on the situation in the XUAR, including by supporting calls for an investigation and accountability for individuals and entities involved in abuses against the people of the XUAR;

(4) the United States should continue to use targeted sanctions and all diplomatic tools available to hold those responsible for the atrocities in Xinjiang to account;

(5) United States agencies engaged with China on trade, climate, defense, or other bilateral issues should include human rights abuses in the XUAR as a consideration in developing United States policy;

(6) the United States supports Radio Free Asia Uyghur, the only Uyghur-language news service in
the world independent of Chinese government influence; and

(7) the United States recognizes the repeated requests from the United Nations High Commissioner for Human Rights for unfettered access to the XUAR and the PRC’s refusal to comply, and therefore—

(A) PRC authorities must allow unfettered access by the United Nations Office of the High Commissioner for Human Rights to the XUAR;

(B) the United States should urge collaborative action between the United States Government and international partners to pressure PRC authorities to allow unfettered access to the XUAR;

(C) the President, the Secretary of State, and the United States Ambassador to the United Nations should simultaneously outline a strategy to investigate the human rights abuses and crimes that have taken place in the XUAR, collect evidence, and transfer the evidence to a competent court; and

(D) United States partners and allies should undertake similar strategies in an effort to build an international investigation outside of
the PRC if PRC authorities do not comply with a United Nations investigation in the XUAR.

SEC. 30306. UYGHUR HUMAN RIGHTS PROTECTION.

(a) SHORT TITLE.—This section may be cited as the “Uyghur Human Rights Protection Act”.

(b) FINDINGS.—Congress makes the following findings:

(1) The Government of the People’s Republic of China (PRC) has a long history of repressing Turkic Muslims and other Muslim minority groups, particularly Uyghurs, in the Xinjiang Uyghur Autonomous Region (commonly referred to as “Xinjiang” or “XUAR”), also known as East Turkestan. Central and regional PRC government policies have systematically discriminated against these minority groups by denying them a range of civil and political rights, particularly freedom of religion. Senior Chinese Communist Party (CCP) officials bear direct responsibility for these gross human rights violations.

(2) PRC government abuses include the arbitrary detention of more than 1,000,000 Uyghurs, ethnic Kazakhs, Kyrgyz, and members of other Muslim minority groups, separation of working age adults from their children and elderly parents, and the integration of forced labor into supply chains.

Recent media reports indicate that since 2019, the PRC government has newly constructed, expanded, or fortified at least 60 detention facilities with higher security or prison-like features in Xinjiang.

(C) Eligibility for admission under other classification.—An alien may not be denied the opportunity to apply for admission as a refugee or asylum under this section solely because such alien qualifies as an immediate relative of a national of the United States or is eligible for admission to the United States under any other immigrant classification.

SEC. 30313. SENSE OF CONGRESS CONDEMNING ANTI-ASIAN RACISM AND DISCRIMINATION.

(a) FINDINGS.—Congress makes the following findings:

(1) Since the onset of the COVID–19 pandemic, crimes and discrimination against Asians and those of Asian descent have risen dramatically worldwide. In May 2020, United Nations Secretary General Antonio Guterres said “the pandemic continues to unleash a tsunami of hate and xenophobia,
scapegoating and scare-mongering” and urged gov-
ernments to “act now to strengthen the immunity of
our societies against the virus of hate”.

(2) Over 2 million Asian Americans and Pacific
Islanders are working on the front lines of the
COVID–19 pandemic in healthcare, law enforce-
ment, first responders, transportation, super-
markets, and other service industries. AAPI workers
also make up a large share—between 6 percent and
12 percent based on sector—of the bio medical field.

(3) The United States Census Bureau notes
that Americans of Asian descent made up 7.2 per-
cent of the population according to the 2020 decen-
nial census, and that Asian Americans are the fast-
est-growing racial group in the United States, pro-
jected to represent 14 percent of the United States
population by 2065.

(4) Since January 2020, there has been a dra-
matic increase in reports of hate crimes and inci-
dents against those of Asian descent.

(5) According to reports, there are over 10,000
reported cases of anti-Asian American hate incidents
and discrimination related to COVID–19 between
(6) Local police departments are reporting an exponential increase in anti-Asian hate incidents and crimes. The New York Police Department reported a 343 percent spike in anti-Asian crime in 2021 from 2020, and the San Francisco Police Department reported anti-AAPI hate crimes increased by 567 percent from 2020 to 2021.

(7) Multiple incidents of anti-Asian violence occurred since March 2020, including a woman wearing a mask who was kicked and punched at a New York City subway station, two children and two adults were stabbed at a wholesale grocery store in Midland, Texas, a couple was assaulted and robbed by a group of attackers in Philadelphia, and a 16-year-old boy was sent to the hospital after being attacked by bullies in Los Angeles, California.

(8) Anti-Asian discrimination and hate since the start of the COVID–19 outbreak has continued throughout the pandemic.

(9) Since the start of 2021, there has been a surge in anti-Asian attacks targeting predominately elderly Asian Americans.

(10) On January 30, 2021, an 84-year-old Thai man, Vicha Ratanapakdee, died from injuries sus-
tained from an unprovoked assault while on his rou-
tine morning walk in San Francisco, California.

(11) In January 2021, a series of attacks oc-
curred in Oakland’s Chinatown targeting Asian
American seniors, the victims included a 91-year-old
man, a 60-year-old man, and a 55-year-old woman,
who were all violently shoved to the ground in three
separate incidents.

(12) In February 2021, victims of anti-Asian
violence included a 61-year-old Filipino man who
was attacked and slashed across his face on a New
York City subway, a Filipino woman in her 80s who
was punched in an unprovoked attack while riding a
trolley in San Diego, and a 52-year-old Asian
woman who was attacked and forcefully shoved while
waiting in line outside of a bakery in Flushing, New
York.

(13) In December 2021, a 61-year-old Chinese
man, Yao Pan Ma, died from injuries sustained from
an unprovoked assault in April of 2021 in New York
City.

(14) Anti-Asian racism has also resulted in
Asian American businesses being targeted for van-
dalism.
(15) There are approximately 2 million Asian American-owned businesses that generate over $700 billion in annual revenue and employ millions of workers.

(16) More than 1,900,000 Asian American and Pacific Islander older adults, particularly those older adults who are recent immigrants or have limited English proficiency, may face even greater challenges in dealing with the COVID–19 pandemic, including discrimination, economic insecurity, and language isolation.

(17) The World Health Organization (WHO) and the Centers for Disease Control and Prevention (CDC) recognize that naming COVID–19 by its geographic location or linking it to a specific ethnicity perpetuates stigma.

(18) In 2015, the WHO issued guidance calling on media outlets, scientists, and national authorities to avoid naming infectious diseases for locations to avoid stigmatizing groups of people.

(19) On February 27, 2020, the Secretary of Health and Human Services stated, “ethnicity is not what causes the novel coronavirus” and that it is inappropriate and inaccurate to call COVID–19 the “Chinese virus”.

(20) On February 28, 2020, Dr. Mitch Wolfe, the Chief Medical Officer of the CDC, said, “Stigma is the enemy of public health”.

(21) On March 10, 2020, Dr. Robert Redfield, the Director of the CDC, testified that use of the term “Chinese coronavirus” is wrong and inappropriate.

(22) On January 26, 2021, President Biden issued a Presidential Memorandum “Condemning and Combating Racism, Xenophobia, and Intolerance Against Asian Americans and Pacific Islanders in the United States”.

(b) SENSE OF CONGRESS.—It is the sense of Congress as follows:

(1) The use of anti-Asian terminology and rhetoric related to COVID–19, such as the “Chinese Virus”, “Wuhan Virus”, and “Kung-flu”, has perpetuated anti-Asian stigma.

(2) The use of anti-Asian rhetoric has resulted in Asian Americans being harassed, assaulted, and scapegoated for the COVID–19 pandemic.

(3) The reprehensible attacks on people of Asian descent and the concerning increase in anti-Asian sentiment and racism in the United States
and around the world have no place in a peaceful, civilized, and tolerant world.

(4) The United States is a diverse country with a proud tradition of immigration, and the strength and vibrancy of the United States is enhanced by the diverse ethnic backgrounds and tolerance of its citizens, including Asian Americans and Pacific Islanders.

(5) The United States Government should encourage foreign governments to use the official and scientific names for the COVID–19 pandemic, as recommended by the World Health Organization and the Centers for Disease Control and Prevention.

(6) The United States Government and other governments around the world must actively oppose racism and intolerance, and use all available and appropriate tools to combat the spread of anti-Asian racism and discrimination.

SEC. 30314. ANNUAL REPORTING ON CENSORSHIP OF FREE SPEECH WITH RESPECT TO INTERNATIONAL ABUSES OF HUMAN RIGHTS.

Section 116(d) of the Foreign Assistance Act of 1961 (227 U.S.C. 2151n(d)) is amended—

(1) in paragraph (11)(C), by striking “and” at the end;
(2) in paragraph (12)(C)(ii), by striking the period at the end and inserting a semicolon; and

(3) by adding at the end the following:

“(13) wherever applicable, instances in which the government of each country has attempted to extraterritorially intimidate or pressure a company or entity to censor or self-censor the speech of its employees, contractors, customers, or associated staff with regards to the abuse of human rights in such country, or sought retaliation against such employees or contractors for the same, including any instance in which the Government of the People’s Republic of China has sought to extraterritorially censor or punish speech that is otherwise legal in the United States on the topics of—

“(A) repression and violation of fundamental freedoms in Hong Kong;

“(B) repression and persecution of religious and ethnic minorities in China, including in the Xinjiang Uyghur Autonomous Region and the Tibet Autonomous Region;

“(C) efforts to proliferate and use surveillance technologies to surveil activists, journalists, opposition politicians, or to profile persons of different ethnicities; and
“(D) other gross violations of human rights; and

“(14) wherever applicable, instances in which a company or entity located in or based in a third country has censored or self-censored the speech of its employees, contractors, customers, or associated staff on the topic of abuse of human rights in each country or sought to retaliate against such employees for the same, due to intimidation or pressure from or the fear of intimidation by the foreign government.”.

SEC. 30315. POLICY TOWARD THE XXIV OLYMPIC WINTER GAMES AND THE XIII PARALYMPIC WINTER GAMES.

(a) FINDINGS.—Congress finds the following:

(1) In October 2020, 39 countries at the United Nations Third Committee of the General Assembly appealed for action on the mass arbitrary detentions and other crimes against the Uyghur Muslim population of the Xinjiang Uyghur Autonomous Region.

(2) The 2018 concluding observations of the United Nations Committee on the Elimination of Racial Discrimination decried reports of mass arbitrary detention of Uyghurs.
(3) Over 400 international nongovernmental organizations have joined together to decry the mass arbitrary detentions of Uyghurs in the Xinjiang Uyghur Autonomous Region.

(4) The Olympic Charter states that the practice of sport “is a human right” that “shall be secured without discrimination of any kind, such as race, colour, sex, sexual orientation, language, religion, political or other opinion, national or social origin, property, birth or other status”, a right that by definition cannot be secured in a country in which over 1,000,000 people are imprisoned in camps because of their race, language, and religion.

(5) The 2008 Olympics in Beijing were accompanied by widespread tracking, arrest, and intimidation of foreign journalists and bloggers, as well as restrictions on movement of journalists, contrary to explicit commitments made by the Government of the People’s Republic of China (PRC) to the International Olympic Committee.

(6) The Government of the PRC denied visas for some journalists granted press accreditation for the 2008 Olympic Games, and the Beijing Organising Committee of the Olympic Games repeat-
edly refused to address incidents involving freedom
of expression.

(7) The International Olympic Committee faced
broad criticism for failing to adequately anticipate
infringements by the Government of the PRC’s on
freedom of expression and press for international
media and 2008 Olympics participants, and failing
to hold the Government of the PRC to their own
commitments to safeguard human rights during the
2008 games.

(b) SENSE OF CONGRESS.—It is the sense of Con-
gress that the International Olympic Committee should—

(1) consider that the Olympic Charter’s prin-
ciples of solidarity and nondiscrimination are hard to
reconcile with holding the 2022 Winter Games in a
country the government of which stands credibly ac-
cused of perpetrating crimes against humanity and
genocide against ethnic and religious minorities;

(2) take into account the recent precedent of
the 2008 games, at which Olympic athletes, spec-
tators, and international media had their funda-
mental freedoms severely challenged, and the likely
limitations the Government of the PRC will seek to
enforce on participants speaking out about ongoing
persecution of the Uyghurs and other human rights
abuses in the PRC, despite repeated commitments by the Government of the PRC;

(3) emphasize that the International Olympic Committee is not opposed to moving an Olympic competition in all circumstances, and should immediately rebid the 2022 Winter Olympic Games to be hosted by a country that recognizes and respects human rights;

(4) develop a framework for reprimanding or disqualifying host cities and the countries in which they are located if the governments of such countries are actively committing mass atrocities—

(A) during the Olympic and Paralympic bidding process; or

(B) between a city’s election as a host city and the duration of the Olympic and Paralympic Games that its government is hosting;

(5) affirm the International Olympic Committee’s—

(A) desire to stay above politics does not permit turning a blind eye to mass atrocity crimes, which cannot and should not be dismissed as mere political concerns; and
(B) commitment to the fundamental rights instruments of the international system, which are beyond partisan or domestic policy, and upon which the success of the entire Olympic project depends;

(6) not hold future Olympic games in countries that are committing genocide;

(7) propose a set of clear, executable actions to be taken by the International Olympic Committee upon infringement of freedom of expression by a host country’s government during any Olympics event, including the 2022 Winter Olympics, against athletes, participants, and international media; and

(8) rescind Rule 50 of the Olympic Charter, which restricts the freedom of expression by athletes when competing during Olympics events, and affirm the rights of athletes to political and other speech during athletic competitions, including speech that is critical of their host countries.

(e) STATEMENT OF POLICY.—It shall be the policy of the United States—

(1) to implement a presidential and cabinet level diplomatic boycott of the XXIV Olympic Winter Games and the XIII Paralympic Winter Games in the PRC;
(2) to encourage other nations, especially demo-
cratic partners and allies, to do the same; and

(3) to call for an end to the Chinese Communist
Party’s ongoing human rights abuses, including the
Uyghur genocide.

son, that the end-user or ultimate consignee will use the item to enable human rights abuses.

The report shall be submitted in unclassified form, but may include a classified annex.

(g) Conforming Amendment.—Section 1752(2)(A) of the Export Control Reform Act of 2018 (50 U.S.C. 4811(2)(A)) is amended—

(1) in clause (iv), by striking “; or” and inserting a semicolon;
(2) in clause (v), by striking the period and inserting “; or”; and

(3) by adding at the end the following:

“(vi) serious human rights abuses.”.

(h) DEFINITIONS.—In this section:

(1) END-USER; KNOWLEDGE; ULTIMATE CONSIGNEE.—The terms “end-user”, “knowledge”, and “ultimate consignee” have the meanings given those terms in section 772.1 of the Export Administration Regulations.

(3) SECRETARY.—The term “Secretary” means the Secretary of Commerce.

SEC. 30317. SENSE OF CONGRESS ON COMMERCIAL EXPORT CONTROL POLICY.

It is the sense of Congress that the President should reexamine United States commercial export control policy for any country, including the People’s Republic of China, that is known to supply arms or dual use items to any
country the government of which has been designated pur-

suant to any applicable provision of law as a state sponsor

of terrorism or to any entity designated by the Secretary

of State as a foreign terrorist organization.

FORCED STERILIZATION, OR IN VOLUNTARY

CONTRACEPTIVE IMPLANTATION IN THE

XINJIANG UYGHUR AUTONOMOUS REGION.

(a) In General.—Section 6(a)(1) of the Uyghur

Human Rights Policy Act of 2020 (Public Law 116–145;

SEC. 30321. SENSE OF CONGRESS REGARDING ANNUAL COUNTRY REPORTS ON HUMAN RIGHTS PRACTICES.

It is the sense of Congress that the Department of State’s annual Country Reports on Human Rights Practices should include relevant information regarding whether a particular country has provided assistance to the PRC or any entity under the influence of the Chinese Com-

It is the sense of Congress that—

(1) the challenges presented by a nonmarket economy like the economy of the People's Republic of China (PRC), which has captured such a large share of global economic exchange, are in many ways unprecedented and require sufficiently elevated and sustained long-term focus and engagement;

(2) in order to truly address the most detrimental aspects of Chinese Communist Party (CCP)-directed mercantilist economic strategy, the United States must adopt policies that—

(A) expose the full scope and scale of intellectual property theft and mass subsidization of Chinese firms, and the resulting harm to the
United States, foreign markets, and the global economy;

(B) ensure that PRC companies face costs and consequences for anticompetitive behavior;

(C) provide options for affected United States persons to address and respond to unreasonable and discriminatory CCP-directed industrial policies; and

(3) the United States must work with its allies and partners and multilateral venues and fora—

(A) to reinforce long-standing generally accepted principles of fair competition and market behavior and address the PRC’s anticompetitive economic and industrial policies that undermine decades of global growth and innovation;

(B) to ensure that the PRC is not granted the same treatment as that of a free-market economy until it ceases the implementation of laws, regulations, policies, and practices that provide unfair advantage to PRC firms in fur-
therance of national objectives and impose un-
reasonable, discriminatory, and illegal burdens
on market-based international commerce; and

(C) to align policies with respect to curbing
state-directed subsidization of the private sec-
tor, such as advocating for global rules related
to transparency and adherence to notification
requirements, including through the efforts cur-
rently being advanced by the United States,
Japan, and the European Union;

(4) the United States and its allies and part-
ners must collaborate to provide incentives to their
respective companies to cooperate in areas such as—

(A) advocating for protection of intellectual
property rights in markets around the world;

(B) fostering open technical standards;
and

seas markets; and

that—

the House of Representatives.

may activate the response team for an additional

SEC. 30403. COUNTERING OVERSEAS KLEPTOCRACY.

(a) FINDINGS.—Congress finds the following:

(1) Authoritarian leaders in foreign countries
abuse their power to steal assets from state institu-
tions, enrich themselves at the expense of their coun-
tries’ economic development, and use corruption as
a strategic tool both to solidify their grip on power
and to undermine democratic institutions abroad.

(2) Global corruption harms the competitiveness
of United States businesses, weakens democratic
governance, feeds terrorist recruitment and
transnational organized crime, enables drug smugg-
gling and human trafficking, and stymies economic
growth.

(3) Illicit financial flows often penetrate coun-
tries through what appear to be legitimate financial
transactions, as kleptocrats launder money, use shell
companies, amass offshore wealth, and participate in
a global shadow economy.

(4) The Government of the Russian Federation
is a leading model of this type of kleptocratic sys-
tem, using state-sanctioned corruption to both erode
democratic governance from within and discredit de-
mocracy abroad, thereby strengthening the authori-
tarian rule of Vladimir Putin.

(5) Corrupt individuals and entities in the Rus-

tian Federation, often with the backing and encour-

agement of political leadership, use stolen money—

(A) to purchase key assets in other coun-

tries, often with a goal of attaining monopolistic

control of a sector;

(B) to gain access to and influence the

policies of other countries; and

(C) to advance Russian interests in other

countries, particularly those that undermine

confidence and trust in democratic systems.

(6) Systemic corruption in the People’s Repub-

lic of China (PRC), often tied to, directed by, or

backed by the leadership of the Chinese Communist

Party (CCP) and the Government of the PRC is

used—

(A) to provide unfair advantage to certain

PRC economic entities;

(B) to increase other countries’ economic

dependence on the PRC to secure greater def-

erence to the PRC’s diplomatic and strategic

goals; and
(C) to exploit corruption in foreign governments and among other political elites to enable PRC state-backed firms to pursue predatory and exploitative economic practices.

(7) Thwarting these tactics by Russian, Chinese, and other kleptocratic actors requires the international community to strengthen democratic governance and the rule of law. International cooperation in combating corruption and illicit finance is vital to such efforts, especially by empowering reformers in foreign countries during historic political openings for the establishment of the rule of law in those countries.

(8) Technical assistance programs that combat corruption and strengthen the rule of law, including through assistance provided by the Department of State’s Bureau of International Narcotics and Law Enforcement Affairs and the United States Agency for International Development, and through programs like the Department of Justice’s Office of Overseas Prosecutorial Development, Assistance and Training and the International Criminal Investigative Training Assistance Program, can have lasting and significant impacts for both foreign and United States interests.
(9) There currently exist numerous international instruments to combat corruption, kleptocracy, and illicit finance, including—

(A) the Inter-American Convention against Corruption of the Organization of American States, done at Caracas March 29, 1996;

(B) the Convention on Combating Bribery of Foreign Public Officials in International Business Transactions of the Organisation of Economic Co-operation and Development, done at Paris December 21, 1997 (commonly referred to as the “Anti-Bribery Convention”);

(C) the United Nations Convention against Transnational Organized Crime, done at New York November 15, 2000;

(D) the United Nations Convention against Corruption, done at New York October 31, 2003;

(E) Recommendation of the Council for Further Combating Bribery of Foreign Public Officials in International Business Transactions, adopted November 26, 2009; and

(3) to support foreign states in promoting good governance and combating public corruption;

(4) to encourage and assist foreign partner countries to identify and close loopholes in their legal and financial architecture, including the misuse of anonymous shell companies and other legal structures, that are enabling illicit finance to penetrate their financial systems;

(5) to help foreign partner countries to investigate, prosecute, adjudicate, and more generally combat the use of corruption by malign actors, including authoritarian governments, particularly the Government of the Russian Federation and the Government of the People’s Republic of China, as a tool of malign influence worldwide;
(6) to assist in the recovery of kleptocracy-related stolen assets for victims, including through the use of appropriate bilateral arrangements and international agreements, such as the United Nations Convention against Corruption, done at New York October 31, 2003, and the United Nations Convention against Transnational Organized Crime, done at New York November 15, 2000;

TITLE VI—INVESTING IN A SUSTAINABLE FUTURE

SEC. 30601. ENSURING NATIONAL SECURITY AND ECONOMIC PRIORITIES WITH THE PEOPLE’S REPUBLIC OF CHINA AND OTHER COUNTRIES ACCOUNT FOR ENVIRONMENTAL ISSUES AND CLIMATE CHANGE.

(a) FINDINGS.—Congress finds the following:

(1) The Special Report: Global Warming of 1.5°C, published by the Intergovernmental Panel on Climate Change on October 8, 2018, and the Fourth National Climate Assessment, first published by the United States Global Change Research Program in 2018, concluded that—

(A) the release of greenhouse gas emissions, most notably the combustion of fossil fuels and the degradation of natural resources that absorb atmospheric carbon from human activity, are the dominant causes of climate change during the past century;

(B) changes in the Earth’s climate are—

(i) causing sea levels to rise;

(ii) increasing the global average temperature of the Earth;
(iii) increasing the incidence and severity of wildfires; and

(iv) intensifying the severity of extreme weather, including hurricanes, cyclones, typhoons, flooding, droughts, and other disasters that threaten human life, healthy communities, and critical infrastructure.

(2) An increase in the global average temperature of 2 degrees Celsius compared to pre-industrialized levels would cause—

(A) the displacement, and the forced internal migration, of an estimated 143,000,000 people in Latin America, South Asia, and Sub-Saharan Africa by 2050 if insufficient action is taken (according to the World Bank);

(B) the displacement of an average of 17,800,000 people worldwide by floods every year (according to the Internal Displacement Monitoring Centre) because of the exacerbating effects of climate change;

(C) more than $500,000,000,000 in lost annual economic output in the United States (a 10 percent contraction from 2018 levels) by
2100 (according to the Fourth National Climate Assessment);

(D) an additional 100,000,000 people worldwide to be driven into poverty by 2030 (according to the World Bank);

(E) greater food insecurity and decreased agricultural production due to climate change’s effects on the increased frequency and intensity of extreme weather events;

(F) the proliferation of agricultural pests and crop diseases, loss of biodiversity, degrading ecosystems, and water scarcity; and

(G) more than 350,000,000 additional people worldwide to be exposed to deadly heat stress by 2050.

(3) According to the International Energy Agency, the United States, China, India, and the European Union (including the United Kingdom) account for more than 58 percent of global greenhouse gas emissions. China, which is the world’s top greenhouse gases emitter and has an outsized impact on the United States’ core interest in climate stability—

(A) is likely to achieve its carbon emissions mitigation pledge to the Paris Agreement, con-
tained in its 2015 nationally determined con-
tribution, to “peak” emissions around 2030
ahead of schedule;

(B) announced, on September 22, 2020,
and restated on April 22, 2021, a pledge to
achieve carbon neutrality by 2060;

(C) announced on April 22, 2021, its in-
tent to strictly control coal fired power genera-
tion projects, as well as strictly limit the in-
crease in coal consumption over the 14th five
year plan period and phase it down in the 15th
five year plan period; and

(D) however, remains uncommitted to
internationally recognized metrics for achieving
these goals.

(b) Sense of Congress.—It is the sense of Con-
gress that—

(1) to address the climate crisis, the United
States must leverage the full weight of its diplomatic
engagement and foreign assistance to promote our
national security and economic interests related to
climate change;

(2) in the absence of United States leadership
on global issues driving international climate-related
policymaking, it would lead to a substantial and
harmful decline in the Nation’s global competitiveness;

(3) promoting international instruments on climate action and other relevant international standards and best practices, as such standards and practices develop, serve the interests of the American people and protect United States environmental resources and the planet;

(4) promoting the adoption and implementation of international climate-related agreements, standards, and practices by foreign states ensures a level playing field for United States businesses and other stakeholders;

(5) working with international allies and partners to promote environmental justice and climate justice serves the American people’s interests;

(6) finding common ground with the People’s Republic of China (PRC) on climate action where possible is important, but the United States must also continue to hold the PRC accountable where its actions undermine the interests of the United States and its allies and partners;

(7) and in furtherance of the previous clauses, the United States should—
(A) explore opportunities for constructive cooperation on climate action initiatives with the PRC and other countries while ensuring the United States maintains its competitive advantage in climate-related fields of expertise and industry, including—

(i) support for international cooperative policies, measures, and technologies to decarbonize industry and power, including through circular economy, energy storage and grid reliability, carbon capture, and green hydrogen; and

(ii) increased deployment of clean energy, including renewable and advanced nuclear power; green and climate resilient agriculture; energy efficient buildings; green, and low-carbon transportation;

(B) cooperate on addressing emissions of methane and other non-CO$_2$ greenhouse gases;

(C) cooperate on addressing emissions from international civil aviation and maritime activities;

(D) reduce emissions from coal, oil, and gas;
(E) implement the Paris Agreement that significantly advances global climate ambition on mitigation, adaptation, and support;

(F) coordinate among relevant Federal, State, and local departments and agencies on climate action related initiatives;

(G) provide resources, authorities and support for enhancing United States ambition and commitment to solving the climate crisis including climate action specific assistance and multi-lateral fund contributions; and

(H) integrate considerations for climate change into broader United States foreign policy decision-making and the United States national security apparatus.

(c) PURPOSE.—The purpose of this section is to provide authorities, resources, policies, and recommended administrative actions—

(1) to restore United States global leadership on addressing the climate crisis and make United States climate action and climate diplomacy a more central tenet of United States foreign policy;

(2) to improve the United States commitment to taking more ambitious action to help mitigate global greenhouse gas emission and improve devel-
oping countries’ resilience and adaptation capacities
to the effects of climate change;

(3) to ensure the United States maintains com-
petitive advantage over global strategic competitors
in diplomacy and new technological development;

(4) to encourage the pursuit of new bilateral co-
operation agreements with other world powers on
initiatives to advance global clean energy innovation
and other measures to mitigate global greenhouse
gas emissions and improve climate change adapta-
cation capacities;

(5) to ensure that the United States national
security apparatus integrates critically important
data on the compounding effects that climate change
is having on global security risks by enhancing our
understanding of how, where, and when such effects
are destabilizing countries and regions in ways that
may motivate conflict, displacement, and other driv-
ers of insecurity; and

(1) successful mitigation of global greenhouse gas emissions and changes to the environment require global cooperation and coordination of efforts, as well as holding other countries such as the People’s Republic of China (PRC) accountable for their
actions and commitments to ensure a level playing field with the United States and its allies and partners;

(2) other countries look toward the United States and the PRC, as the world’s largest emitters and largest economies, for leadership by example to effectively mitigate greenhouse gas emissions, develop and deploy energy generation technologies, and integrate sustainable adaptation solutions to the inevitable effects of climate change;

(3) given the volume of the PRC’s greenhouse gas emissions and the scientific imperative to swiftly reduce global greenhouse gas emissions to net-zero emissions around 2050, China should—

(A) revise its long-term pledge;
(B) seek to immediately peak its emissions;
(C) begin reducing its greenhouse gas emissions significantly to meet a more ambitious long-term 2050 reductions target; and
(D) update its nationally determined contribution along a trajectory that aligns with achieving a more ambitious net-zero by 2050 emissions target;

(4) it is in the United States national interest to emphasize the environment and climate change in
its bilateral engagement with the PRC, as global climate risks cannot be mitigated without a significant reduction in PRC domestic and overseas emissions;

(5) the United States and the PRC, to the extent practicable, should coordinate on making and delivering ambitious pledges to reduce greenhouse gas emissions, with aspirations towards achieving net zero greenhouse gas emissions by 2050;

(6) the United States and its allies and partners should work together, using diplomatic and economic tools, to hold the PRC accountable for any failure by the PRC—

(A) to increase ambition in its 2030 nationally determined contribution, in line with net zero greenhouse gas emissions by 2050 before the 26th Conference of the Parties to the UNFCCC scheduled for November 2021 and meeting a more ambitious nationally determined contribution;

(B) to work faithfully to uphold the principles, goals, and rules of the Paris Agreement;

(C) to avoid and prohibit efforts to undermine or devolve the Paris Agreement’s rule or underlying framework, particularly within areas
of accountability transparency, and shared re-
ponsibility among all parties;

(D) to eliminate greenhouse gas intensive
projects from the PRC’s Belt and Road Initia-
tive and other overseas investments, includ-
ing—

(i) working with United States allies
and partners to eliminate support for coal
power production projects in the Belt and
Road Initiative;

(ii) providing financing and project
support for cleaner and less risky alter-
 natives; and

(iii) undertaking “parallel initiatives”
to enhance capacity building programs and
overseas sustainable investment criteria,
including in areas such as integrated en-
ergy planning, power sector reform, just
transition, distributed generation, procure-
ment, transparency, and standards to sup-
port low-emissions growth in developing
countries; and

(E) to phase out existing coal power plants
and reduce net coal power production;
(7) the United States should pursue confidence-building opportunities for the United States and the PRC to undertake “parallel initiatives” on clean energy research, development, finance, and deployment, including through economic and stimulus measures with clear, mutually agreed upon rules and policies to protect intellectual property, ensure equitable, nonpunitive provision of support, and verify implementation, which would provide catalytic progress towards delivering a global clean energy transformation that benefits all people;

(8) the United States should pursue cooperative initiatives to reduce global deforestation, including efforts to shift toward the import and consummation of forest and agricultural commodities that are produced in a manner that does not contribute to deforestation;

(9) the United States should pursue appropriate scientific cooperative exchanges and research that align with United States interests and those of its international partners and allies, provide reciprocity of access, protect intellectual property rights, and preserve the values and human rights interests of the American people;
(10) the U.S. Special Presidential Envoy for Climate should seek to work with other countries to require China end its classification of “developing nation” within the Paris Agreement; and

(11) the United States should seek to require the Chinese Communist Party to match emission cutting targets established by the United States.

SEC. 30604. PROMOTING RESPONSIBLE DEVELOPMENT ALTERNATIVES TO THE PEOPLE’S REPUBLIC OF CHINA’S BELT AND ROAD INITIATIVE.

(a) In General.—The President should seek opportunities to partner with multilateral development finance institutions to develop financing tools based on shared development finance criteria and mechanisms to support investments in developing countries that—

(2), the Secretary of State, the Administrator of the
United States Agency for International Develop-
ment, and the heads of other relevant Federal agen-
cies are authorized to co-finance infrastructure, re-
silience, and environmental adaptation projects that
advance the development objectives of the United
States overseas and provide viable alternatives to
projects that would otherwise be included within the
People’s Republic of China’s Belt and Road Initia-
tive.

(2) **Conditions.**—Co-financing arrangements
authorized pursuant to paragraph (1) may not be
approved unless—

(A) the projects to be financed—

(ii) promote United States national

security or economic interests;
(iii) promote low carbon emissions, including clean energy renewable and nuclear energy projects; and
(iv) will have substantially lower environmental impact than the proposed Belt and Road Initiative alternative; and

Protection Agency, in consultation with the Secretary of State, the Secretary of Energy, the Secretary of Transportation, the Secretary of Commerce, and the Commandant of the Coast Guard, shall develop a comprehensive plan to reduce black carbon emissions from ships based on appropriate emissions data from oceangoing vessels. The plan shall provide for such reduction through—

(1) a clean freight partnership;

SEC. 30609. BUILDING UNITED STATES ECONOMIC GROWTH AND TECHNOLOGICAL INNOVATION THROUGH THE GREEN CLIMATE FUND.

(a) Green Climate Fund.—

(1) Findings.—Congress finds that—

(A) climate change most severely impacts vulnerable and disadvantaged communities in the United States and around the world;

(B) it is the responsibility of the United States Government to work with and press other countries to address environmental justice and climate justice;
(C) the report of the United Nations Environment Programme entitled “Climate Change and the Cost of Capital in Developing Countries”, dated May 2018, found that, in the 10 years prior to the publication of the report, climate vulnerability has cost the 20 nations most affected by catastrophes rooted in climate change an additional $62,000,000,000 in interest payments alone;

(D) individuals and families, particularly communities of color, indigenous communities, and low-income communities, that are on the frontlines of climate change across the globe are often in close proximity to environmental stressors or sources of pollution;

(E) the communities described in subparagraph (D)—

(i) are often the first exposed to the causes and impacts of climate change; and

(ii) have the fewest resources with which to mitigate those impacts or to relocate;

(F) all efforts to adapt to and mitigate climate change must include specific protections for and acknowledgment of the harm of climate
change to communities of color, indigenous peoples, women, and other frontline communities and marginalized peoples around the world;

(G) in Paris, on December 12, 2015, the parties to the United Nations Framework Convention on Climate Change adopted the Paris Agreement, a benchmark agreement—

(i) to combat climate change;

(ii) to accelerate and intensify the actions and investments needed for a sustainable low carbon future; and

(iii) that acknowledges, “Parties should, when taking action to address climate change, respect, promote and consider their respective obligations on human rights, the right to health, the rights of indigenous peoples, local communities, migrants, children, persons with disabilities and people in vulnerable situations and the right to development, as well as gender equality, empowerment of women and intergenerational equity”; 

(H) the Paris Agreement—
(i) notes the importance of “climate justice” when mitigating and adapting to climate change; and

(ii) recognizes “the need for an effective and progressive response to the urgent threat of climate change”;

(I) it is imperative for all countries to undertake mitigation activities to rapidly meet the goal of limiting global warming to not more than 1.5 degrees Celsius;

(J) developed countries have the greatest capacity to mitigate their greenhouse gas emissions, while—

(i) developing countries have the least capacity to engage in mitigation activities; and

(ii) the capacity of developing countries to engage in mitigation activities is less than the national mitigation potential of those developing countries;

(K) the determination for the fair share of mitigation and adaptation activities for each country must take into account—

(i) the historic greenhouse gas emissions of each country; and
(ii) the current capacity of each country to both mitigate greenhouse gas emissions and adapt to climate impacts;

(L) developed countries that have historically emitted a disproportionately high share of greenhouse gas emissions, and reaped the economic benefits of those polluting activities, have a corresponding disproportionately greater responsibility to engage in global mitigation and adaptation activities, as compared to less industrialized countries that have historically polluted far less;

(M) the only realistic way for less industrialized countries to meet their full mitigation potential is through international climate financing by more developed countries;

(N) in the 2009 Copenhagen Accord, developed countries committed to jointly mobilize, starting in 2020, $100,000,000,000 per year in public climate financing (as well as private investment and other alternative forms of finance), for developing countries, a commitment reaffirmed in 2015 in Decision 1/CP.21 of the United Nations Framework Convention on Climate Change, Adoption of the Paris Agreement;
(O) the $100,000,000,000 commitment described in subparagraph (N) was a political compromise that falls short of the actual financing needs for climate action in developing countries;

(P) Bloomberg New Energy Finance has estimated that the transition to renewable energy sources in developing countries will require hundreds of billions of dollars annually;

(Q) the United Nations Environment Programme has estimated that adaptation needs relating to climate change in developing countries may be as much as $300,000,000,000 annually by 2030;

(R) the Green Climate Fund was created in 2010 by 194 countries to serve as a crucial financing mechanism to help developing countries limit or reduce greenhouse gas emissions and adapt to climate change;

(S) in 2015, the United Nations Framework Convention on Climate Change agreed that the Green Climate Fund should serve the goals of the Paris Agreement, which states that “developed country Parties shall provide financial resources to assist developing country Par-
ties with respect to both mitigation and adaptation in continuation of their existing obligations under the Convention’’;

(T) the Green Climate Fund is an essential institution for climate financing, as the Green Climate Fund ensures—

(i) balanced governance between developed and developing countries;

(ii) stakeholder engagement and discourse;

(iii) a balanced approach between mitigation and adaptation;

(iv) fair and equal labor and working conditions;

(v) conservation of biodiversity and critical habitats; and

(vi) strong environmental, social, and gender protections;

(U) the Green Climate Fund—

(i) promotes and protects human rights and the rights of marginalized groups, including indigenous peoples, women, children, and people with disabilities; and
(ii) continues to take steps to strengthen protection for marginalized groups;

(iii) the United States committed $3,000,000,000 of the first $10,000,000,000 raised for the initial resource mobilization period of the Green Climate Fund, though only $\frac{1}{3}$ of this pledge was fulfilled, leaving the United States the only country to fall substantially short of a commitment of a country to the Green Climate Fund; and

(V) the Green Climate Fund is a fully operational and proven institution supporting well over 100 projects and programs in developing countries around the world.

(2) STATEMENT OF POLICY.—It is the policy of the United States to provide climate financing—

(A) as an essential part of the global effort to combat climate change; and

(B) that—

(i) upholds the principles of environmental justice and climate justice;
(ii) supports programs and projects developed by recipient countries and communities;

(iii) is designed and implemented with the free, prior, and informed consent of indigenous peoples and other impacted communities;

(iv) promotes gender equality as essential in all of the projects and programs supported by climate financing;

(v) includes best practices for environmental and social safeguards to ensure that projects and programs supported by climate financing respect fundamental human rights; and

(vi) addresses both mitigation and adaptation as essential aspects of responding to climate change.

(b) Authorization of Appropriations.—There are authorized to be appropriated for contributions to the Green Climate Fund $4,000,000,000 for each of the fiscal years 2022 and 2023.

(e) Sense of Congress.—It is the sense of Congress that the climate financing needs to achieve the greenhouse gas emissions reductions required to keep the
planet at or below 1.5 degrees Celsius of global warming are significantly greater than the amount of funds authorized to be appropriated under subsection (a).

support the prevention of and response to
emerging events exacerbated by climate change;
(C) current annual global assessments of
emerging events exacerbated by climate change;

(g) **Report by the Director of National Intelligence.**—The Director of National Intelligence is encouraged to include, in his or her annual (or more often as appropriate) unclassified testimony, accompanied by a classified annex, if necessary, to Congress (including the Permanent Select Committee on Intelligence of the House of Representatives and the Select Committee on Intelligence of the Senate) on threats to United States national security—

(1) a review of countries and regions at risk of emerging events exacerbated by climate change; and

(2) whenever possible, specific identification of countries and regions at immediate risk of emerging events exacerbated by climate change.

(h) **Sense of Congress.**—It is the sense of Congress that rapid and robust climate change response mechanisms, including the establishment of the Task Force, are
critical for ensuring other countries remain accountable to
their climate action commitments as well as preserving the
national security and economic interests of the United
States.

SEC. 30611. WORKING WITH INTERNATIONAL PARTNERS TO
REDUCE DEFORESTATION.

(a) FINDINGS.—Congress finds the following:

(1) The People's Republic of China (PRC) is
having a substantial impact on the most important
forest ecosystems in the world, and illegal logging
and agricultural expansion have caused the massive
forest loss. According to the World Resources Insti-
tute, the PRC has become the world's leading im-
porter and consumer of timber products, soybeans,
and palm oil, as well as the largest manufacturing
and export country of forest products.

(2) In 2016, the PRC imported logs from more
than 100 countries in the world. According to a
Global Witness report, between January 2013 and
April 2020, Chinese financial institutions provided
more than $22.5 billion to major companies that
produce and trade commodities at high risk of driv-
ing deforestation. These commodities include beef,
soy, palm oil, paper, pulp, rubber, and timber.
(3) Further, the growing international demand for such agricultural commodities causes the majority of deforestation emissions globally, and most of the associated land-clearing violates applicable national or local laws. According to a 2021 Forest Trends report, at least 69 percent of forest land converted to pasture or cropland was cleared illegally.

(4) The growing demand for timber and agricultural commodities has accelerated unsustainable—and often illegal—logging and the trade of timber products, which harms the countries in which it takes place by siphoning away government tax revenue, transforming the livelihoods of communities dependent on forests, and hurting legal businesses’ competitiveness. Further, illegal logging and illegal conversion of forest to agricultural land threatens biodiversity and accelerates deforestation and forest degradation in key timber supply countries, undermining United States and global climate goals.

(5) The United States should work with international partners to ensure that Chinese and other banks factor into lending practices the environmental and social impact of the companies they finance. This should include pressuring the PRC and
other countries to revise regulations to require the banking sector not to finance companies linked to deforestation and include rigorous checks on the companies operating in sectors or regions where there is a high risk of deforestation to ensure they are not associated with deforestation.

(b) DEFINITIONS.—In this section:

(1) ADMINISTRATOR.—Except as otherwise expressly provided, the term “Administrator” means the Administrator of the United States Agency for International Development.

(2) DEFORESTATION.—The term “deforestation” means a change in land use from a forest (including peatlands) to any other land use.

(3) DEVELOPING COUNTRY.—The term “developing country” means a country eligible to receive official development assistance according to the income guidelines of the Development Assistance Committee of the Organisation for Economic Co-operation and Development.

(4) EMISSIONS REDUCTIONS.—The term “emissions reductions” means greenhouse gas emissions reductions achieved from reduced or avoided deforestation under this section.

(5) FOREST.—
(A) IN GENERAL.—The term “forest” means a terrestrial ecosystem, including wetland forests, comprised of native tree species generated and maintained primarily through natural ecological and evolutionary processes.

(B) EXCLUSION.—The term “forest” does not include plantations, such as crops of trees planted by humans primarily for the purposes of harvesting.

(6) FOREST DEGRADATION.—The term “forest degradation” is any reduction in the carbon stock of a forest due to the effects of human land-use activities, including such land-use activities on peatlands.

(7) INTACT FOREST.—The term “intact forest” means an unbroken expanse of natural ecosystems within the global extent of forest cover that—

(A) covers an area of at least 500 square kilometers and is at least 10 kilometers in each direction; and

(B) contains forest and non-forest ecosystems minimally influenced by human economic activity and large enough that all native biodiversity, including viable populations of wide-ranging species, could be maintained.
(9) **Leakage.**—The term “leakage” means the unexpected loss of anticipated carbon benefits due to the displacement of activities in a project area to areas outside the project, resulting in carbon emissions.

(10) **Leakage Prevention Activities.**—The term “leakage prevention activities” means activities in developing countries that are directed at preserving existing forest carbon stocks, including forested wetlands and peatlands that might, absent such activities, be lost through leakage.

(11) **National Deforestation Reduction Activities.**—The term “national deforestation reduction activities” means activities in developing countries that reduce a quantity of greenhouse gas emissions from deforestation that is calculated by measuring actual emissions against a national deforestation baseline established pursuant to subparagraphs (B) and (C) of subsection (d)(4).

(12) **Subnational Deforestation and Forest Degradation Reduction Activities.**—The term “subnational deforestation and forest degradation reduction activities” means activities in developing countries that reduce a quantity of greenhouse gas emissions from deforestation and forest degrada-
tion that is calculated by measuring actual emissions using an appropriate baseline, or an alternative determined under subsection (d)(4)(B)(ii), established by the Administrator at the State or provincial level.

(c) PURPOSES.—The purposes of this section are to provide United States assistance to developing countries to develop, implement, and improve actions that reduce deforestation and forest degradation or conserve or restore forest ecosystems—

(1) to protect the value of forest ecosystems with respect to permanent carbon capture and sequestration in a manner in which such value is measurable, reportable, and verifiable; and

(2) in a manner that—

(A) is consistent with and enhances the implementation of complementary United States policies that support the good governance of forests, biodiversity conservation, and environmentally sustainable development;

(B) takes into consideration the views and participation of local communities and most vulnerable communities and populations, particularly forest-dependent communities; and

(C) incorporates the right to free prior and informed consent of indigenous peoples.
(d) Emissions Reductions Through Reduced Deforestation.—

(1) Establishment of Program.—Not later than 1 year after the date of the enactment of this Act, the Administrator, in consultation with other appropriate agencies, shall establish a program to provide assistance to reduce deforestation in developing countries and its impacts, in accordance with this section.

(2) Objectives.—The objectives of the program established under paragraph (1) shall be—

(A) to achieve—

(i) emissions reductions of at least 7,000,000,000 tons of carbon dioxide equivalent in 2025;

(ii) cumulative emissions reductions of at least 11,000,000,000 tons of carbon dioxide equivalent by December 31, 2030;

and

(iii) additional emissions reductions in subsequent years;

(B) to build capacity to reduce deforestation at a national level in developing countries experiencing deforestation, which may include—
(i) preparing developing countries to participate in international markets for international offset credits for reduced emissions from deforestation;

(ii) supporting the development of overseas domestic policy frameworks to ensure effective, efficient, and equitable benefit-sharing of the proceeds of such credits issued by national and subnational governments; and

(iii) promoting and expanding land titling initiatives and programs in other countries;

(C) to preserve forest carbon stocks in countries where such forest carbon may be vulnerable to leakage, particularly in developing countries with largely intact native forests;

(D) to build the scientific knowledge and institutional capacity to help developing countries—

(i) monitor the effects of climate change on their forests;

(ii) develop and implement strategies to conserve their forests; and
(iii) support forest-dependent communities adapt to climate change;

(E) to the extent practicable, to reduce deforestation in ways that reduce the vulnerability and increase the resilience to climate effects for forests and forest-dependent communities;

(F) to prevent degradation and fragmentation of forests and other intact ecosystems, particularly in tropical countries, including by providing assistance or supporting policies to—

(i) conserve, protect, and restore the integrity of such ecosystems; and

(ii) support the rights of Indigenous People and local communities and their ability to continue their effective stewardship of their intact traditional lands and territories;

(G) to build capacity to address illegal deforestation for agricultural commodities; and

(H) to remove subsidies that favor deforestation;

(c) Requirements for International Deforestation Reduction Program.—

(1) Eligible countries.—
(A) IN GENERAL.—Except as provided in subparagraph (B), the Administrator may pro-
vide assistance under this section only with re-
spect to a developing country that—

(i) the Administrator, in consultation
with other appropriate agencies, deter-
mines—

(I) is experiencing deforestation
or forest degradation; or

(II) has standing forest carbon
stocks that may be at risk of deforest-
ation or degradation;

(ii) has the legal regimes, standards,
and safeguards to ensure that the rights
and interests of indigenous peoples and
forest-dependent communities are pro-
tected in accordance with the standards es-
tablished under paragraph (4); and

(iii) has entered into a bilateral or
multilateral agreement or arrangement
with the United States, or is part of an
international program supported by the
United States to prevent deforestation,
that establishes the conditions of participa-
tion by the country in the program estab-
lished under this section, which shall in-
clude an agreement to meet the standards
established under paragraph (4) for the ac-
tivities to which such standards apply.

(B) EXCEPTION.—A developing country
that does not meet the requirement described in
paragraph (1)(A)(ii) may receive assistance
under this section for the purpose of building
capacity to meet such requirement.

(2) AUTHORIZED ACTIVITIES.—Subject to the
requirements of this section, in providing assistance
under this section, the Administrator may support
activities to achieve the objectives described in sub-
section (c)(2), such as—

(A) national deforestation reduction activi-
ties;

(B) subnational deforestation and forest
degradation reduction activities, including pilot
activities, policies, and measures that reduce
greenhouse gas emissions and are subject to
significant uncertainty;

(C) activities to measure, monitor, and
verify deforestation, avoided deforestation, and
rates of deforestation, including, if applicable,
spatially explicit land use plans that identify in-
tact and primary forest areas and managed forest areas;

(D) leakage prevention activities;

(E) the development and implementation of measurement, monitoring, reporting, and verification capacities and governance structures, including legal regimes, standards, processes, and safeguards, as established under paragraph (4), to enable a country to quantify emissions reductions for purposes of purchasing or trading subnational emissions reduction credits in carbon markets;

(F) the identification of, and actions to address, the drivers of land use emissions;

(N) the promotion of land tenure and titling programs, including legal recognition and effective protection of the land tenure, access and use rights of Indigenous People and local communities; and

(O) the monitoring and evaluation of the results of the activities conducted under this section.

(3) MECHANISMS.—The Administrator shall apply the administrative authorities under the Foreign Assistance Act of 1961 (22 U.S.C. 2151 et seq.), except to the extent inconsistent with the provisions of this section, to the same extent and in the same manner as such authorities apply to the implementation of such Act in order to support activities to achieve the objectives described in subsection (c)(2) by—
(A) developing and implementing programs and project-level activities that achieve such objectives;

(B) to the extent practicable, giving priority in any review process to activities under paragraph (2)(A); and

(C) as appropriate, considering multi-year funding arrangements in carrying out the purposes of this section.

(A) ensure that emissions reductions achieved through supported activities—

(i) are additional, measurable, verifiable, and monitored;

(ii) account for leakage, uncertainty, and permanence; and

(iii) at a minimum, meet the standards established under the emissions unit criteria of the Carbon Offsetting and Reduction Scheme for International Aviation (CORSIA) developed by the International Civil Aviation Organization (ICAO);

(B) require—
(i) the establishment of a national deforestation baseline for each country with national deforestation reduction activities that is used to account for reductions achieved from such activities; or

(ii) if a developing country has established policies and taken measures to reduce emissions from disturbed peatlands, deforestation, or forest degradation, but has not established a national baseline, the provision of a credible, transparent, accurate, and conservative alternative for quantifying emissions;

(C) provide that each national deforestation baseline established under subparagraph (B)(i)—

(i) is national, or subnational on an interim basis, in scope; and

(ii) is consistent with nationally appropriate mitigation commitments or actions with respect to deforestation, taking into consideration—

(I) the average annual historical deforestation rates of the country during a period of at least 5 years; and
(II) the applicable drivers of deforestation and other factors to ensure additionality;

(iii) establishes a trajectory that would result in zero net deforestation by not later than 20 years after the date on which the baseline is established;

(iv) is adjusted over time to account for changing national circumstances; and

(v) is designed to account for all significant sources of greenhouse gas emissions from deforestation in the country;

(D) with respect to assistance provided for activities described in subparagraph (A) or (B) of paragraph (2), require emissions reductions to be achieved and verified before the provision of any assistance under this section;

(E) with respect to accounting for subnational deforestation and forest degradation reduction activities that lack the standardized or precise measurement and monitoring techniques needed for a full accounting of changes in emissions or baselines, or are subject to other sources of uncertainty, apply a conserv-
ative discount factor to reflect the uncertainty regarding the levels of reductions achieved;

(F) ensure that activities under this section are designed, carried out, and managed—

(i) using forest management practices that, in an open and transparent process—

(I) improve the livelihoods of forest communities in a manner that promotes the maintenance of intact forests, protects associated biodiversity, and restores native forest species and ecosystems while avoiding the introduction of invasive nonnative species;

(II) maintain natural biodiversity, resilience, and carbon storage capacity of forests;

(III) to the extent practicable, do not adversely affect the permanence of forest carbon stocks or emissions reductions;

(V) take into account the needs and interests of local communities, forest-dependent communities, indigenous peoples, and vulnerable social groups;

(ii) in consultation with, and with the full and effective participation of, local communities, indigenous peoples, and forest-dependent communities in affected areas, as partners and primary stakeholders, before and during the design, planning, implementation, monitoring, and evaluation of activities; and

(iii) with equitable sharing of profits and benefits derived from the activities with local communities, indigenous peoples, and forest-dependent communities; and

(G) with respect to assistance for all activities under this section, seek to ensure the establishment and enforcement of legal regimes, standards, processes, and safeguards by the country in which the activities are conducted, as a condition of such assistance or as a proposed activity for which such assistance may be provided, which—
(i) protect the rights and interests of local communities, indigenous peoples, forest-dependent communities, human rights defenders, and vulnerable social groups; and

(ii) promote consultations with local communities, indigenous peoples, and forest-dependent communities in affected areas, as partners and primary stakeholders, before and during the design, planning, implementation, monitoring, and evaluation of activities under this section; and

(iii) ensure equitable sharing of profits and benefits from incentives for emissions reductions or leakage prevention with local communities, indigenous peoples, and forest-dependent communities.

(5) Scope.—

(A) Reduced Emissions.—The Administrator shall include reduced emissions from forest degradation and disturbance of peatlands within the scope of activities under this section.

(B) Expansion of Authorized Activities.—If the Administrator determines, in con-
sultation with other appropriate agencies, that sufficient methodologies and technical capacities exist to measure, monitor, and account for the emissions referred to in subparagraph (A), the Administrator may expand the authorized activities under this section, as appropriate, to include reduced soil carbon-derived emissions associated with deforestation and degradation of forested wetlands and peatlands, consistent with a comprehensive approach to maintaining and enhancing forests, increasing climate resiliency, reducing emissions, and increasing removals of greenhouse gases.

(6) ACCOUNTING.—The Administrator shall use a publicly accessible registry to account for and register the emissions reductions achieved through assistance provided under this section each year, after appropriately discounting for uncertainty and other relevant factors as required by the standards established under paragraph (4).

(7) INTERNATIONAL DEFORESTATION REDUCTION PROGRAM INSURANCE ACCOUNT FOR NON-COMPLETION OR REVERSAL.—In furtherance of the objectives described in subsection (c)(2), the Admin-
istrator shall develop and implement a program that—

(A) addresses noncompletion or reversal with respect to any greenhouse gas emissions that were not, or are no longer, sequestered;

and

(B) may include a mechanism to hold in reserve a portion of the amount allocated for projects to support the program.

(8) EXTENSION OF ASSISTANCE.—

(A) IN GENERAL.—The Administrator may extend, for an additional 5 years, the period during which assistance is authorized for activities supported by assistance under this section, if the Administrator determines that—

(i) the country in which the activities are conducted is making substantial progress toward adopting and implementing a program to achieve reductions in deforestation measured against a national baseline;

(ii) the greenhouse gas emissions reductions achieved as a result of the activities are not resulting in significant leakage;
(iii) such greenhouse gas emissions reductions are being appropriately discounted to account for any leakage that is occurring; and

(iv) such extension would further advance or ensure achievement of the objectives of the activities.

(B) ASSISTANCE FOR SUBNATIONAL DEFORESTATION AND FOREST DEGRADATION REDUCTION ACTIVITIES.—

(i) IN GENERAL.—If the Administrator extends the period during which assistance is authorized for activities under subparagraph (A), the Administrator shall determine, based on the criteria specified that subparagraph, whether such assistance should include assistance for subnational deforestation and forest degradation reduction activities.

(ii) CONTINUED ASSISTANCE.—The Administrator may extend the period during which assistance is authorized for subnational deforestation and forest degradation reduction activities beyond the 5-year period described in subparagraph (A) in
order to further the objectives described in subparagraph (B) or (C) of subsection (c)(2).

(9) COORDINATION WITH FOREIGN ASSISTANCE.—Subject to the direction of the President, the Administrator shall, to the extent practicable and consistent with the objectives described in subsection (c)(2), seek to align activities under this section with broader development, poverty alleviation, or natural resource management objectives and initiatives in countries receiving assistance under this section.

(10) ASSISTANCE AS SUPPLEMENT.—The provision of assistance for activities under this section shall be used to supplement, and not to supplant, any other Federal, State, or local support available to carry out activities under this section.

(11) FUNDING LIMITATION.—Of the funds made available to carry out this section in any fiscal year, not more than 7 percent may be used for the administrative expenses of the United States Agency for International Development in support of activities described in paragraph (2). Such amount shall be in addition to other amounts otherwise available for such purposes.

(f) LEGAL EFFECT.—
(1) IN GENERAL.—Nothing in this section may
be construed to supersede, limit, or otherwise affect
any restriction imposed by Federal law (including
regulations) on any interaction between an entity lo-
cated in the United States and an entity located in
a foreign country.

(2) ROLE OF THE SECRETARY OF STATE.—
Nothing in this section may be construed to affect
the role of the Secretary of State or the responsibil-
ities of the Secretary under section 622(c) of the
Foreign Assistance Act of 1961 (22 U.S.C.
2382(c)).

(g) INTERNATIONAL FINANCIAL INSTITUTIONS.—
The President shall direct the United States representa-
tives to the World Bank, the International Monetary
Fund, and other international financial institutions (as de-
 fined in section 1701(c) of the International Financial In-
stitutions Act (22 U.S.C. 262r(c)) to prioritize efforts to
combat deforestation.

(h) REPORT.—Not later than 1 year after the date
of the enactment of this Act, the President shall submit
to Congress a report, with respect to activities under this
section, on the implementation of measurable and sustain-
able development practices and an assessment of resources
related to achieving carbon dioxide emission reduction targets for 2025 and 2030.

SEC. 30612. CONTROLLING THE EXPORT OF ELECTRONIC WASTE TO PROTECT UNITED STATES SUPPLY CHAINS.

(a) FINDINGS.—Congress finds the following:

(1) It is in the national security interests of the United States to ensure that the export of electronic waste does not become the source of counterfeit goods that may reenter electronics supply chains in the United States, and for other purposes.

(2) A 2012 Senate Armed Services Committee Report “discovered counterfeit electronic parts from China in the Air Force’s largest cargo plane, in assemblies intended for Special Operations helicopters, and in a Navy surveillance plane among 1,800 cases of bogus parts”.

(3) Further, exporting such material has often resulted in environmental damage because of illegal dumping or inadequate environmental regulations in other countries for ensuring their safe and secure disposal.

(4) China, the single largest producer of electronic waste, is on track for its e-waste industry to total $23,800,000,000 by 2030, given its high sup-
ply of used products, demand for recycled materials, and capacity to transport these materials.

(5) As the second largest producer of electronic waste, the United States has a strong economic and national security incentive to enhance domestic e-waste recycling capacity rather than exporting to China and other countries.

(6) Given China’s lack of regulations and worker protections, workers in the e-waste industry have been exposed to over 1,000 harmful substances, including lead and mercury, endangering the health and wellbeing of workers.

(b) DEFINITIONS.—In this section:

(9) Used.—The term “used”, with respect to an item, means the item has been operated or employed.

(c) Prohibition.—Except as provided in subsections (c) and (d), no person or entity may export or reexport electronic waste or exempted electronic waste items.

(ii) that delivers a product in communities where alternative nutritional or protein sources are readily available and affordable; and

(B) does not include—

(i) markets in areas where no other practical alternative sources of protein or meat exists, such as wildlife markets in rural areas on which indigenous people and rural local communities rely to feed themselves and their families; and

(ii) processors of dead wild game and fish.

(2) **Commercial trade in live wildlife.**—

The term “commercial trade in live wildlife”—
(A) means commercial trade in live wildlife for human consumption as food or medicine; and

SEC. 30803. STUDY ON RISK OF WILDLIFE MARKETS ON THE EMERGENCE OF NOVEL VIRAL PATHOGENS.

(a) Study.—Not later than 30 days after the date of the enactment of this Act, the Secretary of State, in consultation with the Administrator of the United States Agency for International Development, the Secretary of Health and Human Services, the Secretary of the Interior, and the Secretary of Agriculture shall enter into an agreement with the National Academies of Sciences, Engineering, and Medicine to evaluate the risk wildlife markets
pose to human health through the emergence or reemergence of pathogens and activities to reduce the risk of zoonotic spillover. The study shall evaluate—

(1) the impact of physical proximity to and the role of human use of terrestrial wildlife for food or medicine on the emergence or reemergence of pathogens, including novel pathogens;

(2) the conditions at live wildlife markets and within the associated supply chain that elevate risk factors leading to such emergence, reemergence, or transmission of pathogens, including sanitary conditions and the physical proximity of animals;

(3) animal taxa that present a high risk of contributing to zoonotic spillover and the associated risk factors that increase the emergence, reemergence, or transmission of pathogens;

(4) emerging pathogen risk reduction measures and control options across wildlife markets and the associated supply chain; and

(5) the methods by which the United States might work with international partners to effectively promote diversified, culturally appropriate alternative sources of nutritious food, protein, and related income in communities that currently rely upon the human use of wildlife as food or medicine.
for subsistence, while ensuring that existing natural
habitats are not fragmented, degraded, or destroyed
and that human pressure on natural habitats is not
increased by this process.

(b) REPORT.—Not later than 1 year after the date
of the agreement under subsection (a), the Secretaries de-
scribed in such subsection shall submit a report on the
findings of the study described in such subsection to—

(1) the appropriate congressional committees;

1. immediately;

2. after a transitional period; and

3. aspirationally, over a long-term period.

(b) **Global Health Security Zoonosis Plans.**—

The Secretary of State and the Administrator of the United States Agency for International Development shall work bilaterally with the governments of the countries listed pursuant to subsection (a) to establish Global Health Security Zoonoses Plans that—

1. outline actions to address novel pathogens of zoonotic origin that have the potential to become epidemics or pandemics;

2. identify incentives and strengthened policies; and

(c) UPDATES.—The list of countries required by subsection (a), the corresponding Global Health Security Zoonosis plans established pursuant to subsection (b), and any actions taken under such plans to end the commercial trade in live wildlife and associated wildlife markets for human consumption immediately, during a transitional period, or aspirationally, shall be reviewed, updated, and publicly released annually by the Secretary and Administrator, following review of the most recent scientific data.

SEC. 30805. SENSE OF CONGRESS.

It is the sense of Congress that global institutions, including the Food and Agriculture Organization of the United Nations, the World Organisation for Animal Health, the World Health Organization, and the United Nations Environment Programme, together with leading intergovernmental and nongovernmental organizations, veterinary and medical colleges, the Department of State,
and the United States Agency for International Development, should—

(1) promote the paradigm of One Health as an effective and integrated way to address the complexity of emerging disease threats; and

(2) support improved community health, biodiversity conservation, forest conservation and management, sustainable agriculture, and the safety of livestock, domestic animals, and wildlife in developing countries, particularly in tropical landscapes where there is an elevated risk of zoonotic disease spill over.

SEC. 30806. STATEMENT OF POLICY.

It is the policy of the United States to—

(1) support the availability of scalable and sustainable alternative sources of protein and nutrition for local communities, where appropriate, in order to minimize human reliance on the commercial trade in live wildlife for human consumption;

(2) support foreign governments to—

(A) reduce commercial trade in live wildlife for human consumption;

(B) transition from the commercial trade in live wildlife for human consumption to
sustainably produced alternate protein and nu-
tritional sources;

(C) establish and effectively manage and
protect natural habitat, including protected and
conserved areas and the lands of Indigenous
peoples and local communities, particularly in
countries with tropical forest hotspots for
emerging diseases; and

(D) strengthen public health capacity, par-
ticularly in countries where there is a high risk
of emerging zoonotic viruses and other infec-
tious diseases;

(3) respect the rights and needs of indigenous
peoples and local communities dependent on such
wildlife for nutritional needs and food security; and

(4) facilitate international cooperation by work-
ing with international partners through intergovern-
mental, international, and nongovernmental organi-
zations such as the United Nations to—

(A) lead a resolution at the United Nations
Security Council or General Assembly and
World Health Assembly outlining the danger to
human and animal health from emerging
zoonotic infectious diseases, with recommenda-
tions for implementing the closure of wildlife
markets and prevention of the commercial trade
in live wildlife for human consumption, except
where the consumption of wildlife is necessary
for local food security or where such actions
would significantly disrupt a readily available
and irreplaceable food supply;

(B) raise awareness and build stakeholder
engagement networks, including civil society,
the private sector, and local and regional gov-
ernments on the dangerous potential of wildlife
markets as a source of zoonotic diseases and re-
duce demand for the consumption of wildlife
through evidence-based behavior change pro-
grams, while ensuring that existing wildlife
habitat is not encroached upon or destroyed as
part of this process;

(C) encourage and support alternative
forms of sustainable food production, farming,
and shifts to sustainable sources of protein and
nutrition instead of terrestrial wildlife, where
able and appropriate, and reduce consumer de-
mand for terrestrial and freshwater wildlife
through enhanced local and national food sys-
tems, especially in areas where wildlife markets
play a significant role in meeting subsistence
needs while ensuring that existing wildlife habi-
tat is not encroached upon or destroyed as part
of this process; and

(D) strive to increase biosecurity and hygi-
emic standards implemented in farms, gathering
centers, transport, and market systems around
the globe, especially those specializing in the
 provision of products intended for human con-
sumption.

SEC. 30807. PREVENTION OF FUTURE ZOONOTIC SPILL-

natural resource expertise;

(6) work through international organizations to
develop a set of objective risk-based metrics that
provide a cross-country comparable measure of the
level of risk posed by wildlife trade and marketing
and can be used to track progress nations make in
reducing risks, identify where resources should be
focused, and potentially leverage a peer influence ef-
fact;

(7) prevent the degradation and fragmentation
of forests and other intact ecosystems to minimize
interactions between wildlife and human and live-
stock populations that could contribute to spillover
events and zoonotic disease transmission, including
by providing assistance or supporting policies to, for
example—

(A) conserve, protect, and restore the in-
tegrity of such ecosystems;

TITLE II—PROHIBITIONS OR
CONDITIONS ON CERTAIN
TRANSMITTALS OF FUNDS

SEC. 60201. FINDINGS.

Congress finds the following:

(1) The Financial Crimes Enforcement Net-
work (FinCEN) is the Financial Intelligence Unit of
the United States tasked with safeguarding the fi-
nancial system from illicit use, combating money
laundering and its related crimes including terrorism, and promoting national security.

(2) Per statute, FinCEN may require domestic financial institutions and financial agencies to take certain “special measures” against jurisdictions, institutions, classes of transactions, or types of accounts determined to be of primary money laundering concern, providing the Secretary with a range of options, such as enhanced record-keeping, that can be adapted to target specific money laundering and terrorist financing and to bring pressure on those that pose money laundering threats.

(3) This special-measures authority was granted in 2001, when most cross-border transactions occurred through correspondent or payable-through accounts held with large financial institutions which serve as intermediaries to facilitate financial transactions on behalf of other banks.

(4) Innovations in financial services have transformed and expanded methods of cross-border transactions that could not have been envisioned 20 years ago when FinCEN was given its special-measures authority.

(5) These innovations, particularly through digital assets and informal value transfer systems, while
useful to legitimate consumers and law enforcement, can be tools abused by bad actors like sanctions evaders, fraudsters, money launderers, and those who commit ransomware attacks on victimized U.S. companies and which abuse the financial system to move and obscure the proceeds of their crimes.

(6) Ransomware attacks on U.S. companies requiring payments in cryptocurrencies have increased in recent years, with the U.S. Treasury estimating that ransomware payments in the United States reached $590 million in just the first half of 2021, compared to a total of $416 million in 2020.

(7) In July 2021, the White House, with support of U.S. allies, asserted that the People’s Republic of China was responsible for ransomware operations against private companies that included demands of millions of dollars, including the 2021 ransomware attacks that breached Microsoft email systems and affected thousands of consumers, State and local municipalities, and government contractors attributed to a cyber espionage group with links to the Chinese Ministry of State Security.

(8) As ransomware attacks organized by Chinese and other foreign bad actors continue to grow in size and scope, modernizing FinCEN’s special...
measure authorities will empower FinCEN to adapt its existing tools, monitor and obstruct global financial threats, and meet the challenges of combating 21st century financial crime.

SEC. 60202. PROHIBITIONS OR CONDITIONS ON CERTAIN TRANSMITTALS OF FUNDS.

Section 5318A of title 31, United States Code, is amended—

(1) in subsection (a)(2)(C), by striking “subsection (b)(5)” and inserting “paragraphs (5) and (6) of subsection (b)”;

(2) in subsection (b)—

(A) in paragraph (5), by striking “for on behalf of a foreign banking institution”; and

(B) by adding at the end the following:

“(6) PROHIBITIONS OR CONDITIONS ON CERTAIN TRANSMITTALS OF FUNDS.—If the Secretary finds a jurisdiction outside of the United States, 1 or more financial institutions operating outside of the United States, 1 or more types of accounts within, or involving, a jurisdiction outside of the United States, or 1 or more classes of transactions within, or involving, a jurisdiction outside of the United States to be of primary money laundering concern, the Secretary, in consultation with the Secretary of
the State, the Attorney General, and the Chairman of the Board of Governors of the Federal Reserve System, may prohibit, or impose conditions upon certain transmittals of funds (as such term may be defined by the Secretary in a special measure issuance, by regulation, or as otherwise permitted by law), to or from any domestic financial institution or domestic financial agency if such transmittal of funds involves any such jurisdiction, institution, type of account, or class of transaction.”.

**TITLE III—U.S. STOCK EXCHANGE TRADING PROHIBITION FOR 2 CONSECUTIVE AUDITOR NON-INSPECTION YEARS**

**SEC. 60301. TRADING PROHIBITION FOR 2 CONSECUTIVE NON-INSPECTION YEARS.**

Section 104(i) of the Sarbanes-Oxley Act of 2002 (15 U.S.C. 7214(i)) is amended—

(1) in paragraph (2)(A)(ii), by striking “the foreign jurisdiction described in clause (i)” and inserting “a foreign jurisdiction”; and

(2) in paragraph (3)—

(A) in the paragraph heading, by striking “3” and inserting “2”; and
(B) in subparagraph (A), in the matter preceding clause (i), by striking “3” and inserting “2”.

TITLE IV—COMBATING WILDLIFE TRAFFICKING FINANCING AND PROCEEDS STUDY ACT

SEC. 60401. FINDINGS.

Congress finds the following:

(1) The 2017 report by the think tank, Global Financial Integrity, entitled “Transnational Crime and the Developing World”, determined that the annual global retail value of illegal wildlife trade is between $5 billion to $23 billion, and when losses to ecosystem services are considered, the World Bank estimates the cost of environmental crime is between $1 trillion and $2 trillion, annually.

(2) Wildlife traffickers do not prefer particular species or commodities, but instead, according to the non-governmental organization, United for Wildlife, wildlife traffickers focus on the demand, availability, profit potential, and relatively low risk associated with acquiring, trading, and distributing wildlife globally.
(3) The trafficking of wildlife affects human health because of undetected spread of zoonotic diseases, scarcity in food resources, and the environmental results of degraded ecosystems.

(4) Also, the trafficking of illicit wildlife such as pangolins from Africa, macaws from Peru, turtles from the United States, and rosewood species smuggled globally threatens our national security at home and American interests abroad because rogue organizations, including transnational criminal organizations, use the proceeds to fund illegal and violent acts throughout the world, fueling corruption and benefiting from corrupt government officials, weakening the rule of law, and distorting commercial markets.

(5) Many of these supply chains are affected by Chinese activity, from the criminal organizations involved in the initial poaching of targeted commodities to the demand for goods produced from endangered plants and animals.

(6) The Organized Crime Drug Enforcement Task Forces conducted an investigation known as “Operation Apex” which identified extensive overlaps among drug trafficking organizations, professional
money launderers, and wildlife trafficking syndicates.

(7) A study conducted by Federal entities that examined wildlife trafficking networks determined that—

(A) more than two-thirds of persons trafficking wildlife also trafficked narcotics;

(B) 10 percent of persons trafficking wildlife were doing so to finance terrorism; and

(C) a small percentage of persons trafficking wildlife were doing so to finance the proliferation of nuclear materials.

(8) Because wildlife trafficking is executed as part of a commodity-agnostic global enterprise, the United States and allies of the United States should focus efforts to reduce wildlife trafficking on curtailing the expansive networks that traffic wildlife and other goods and on bringing enforcement actions against persons who launder the proceeds of those persons who traffic wildlife rather than pursue specific nations, groups, or commodities.

(9) In the past decade, the illicit wildlife trade has moved online, mainly to social media platforms, creating jurisdictional and technical challenges for law enforcement.
SEC. 60402. STUDY.

(a) IN GENERAL.—The Secretary of the Treasury and the Secretary of the Interior, acting through the U.S. Fish and Wildlife Service, shall jointly, not later than 2 years after the date of the enactment of this Act, conduct a study with respect to wildlife trafficking financing and proceeds and submit a report on such study to—

(3) an overview of the roles of professional money launderers, corporate and trust formation agents, kleptocrats, and other supply chain and financial facilitators with respect to wildlife trafficking;
(4) a discussion, based on a consideration of relevant prior studies and investigations, of the convergence of wildlife trafficking with other types of trafficking, including trafficking in persons, timber trafficking, and narcotics trafficking, including shared supply chains and financial facilitators;

(5) an overview of the national security implications associated with wildlife trafficking and the financing and proceeds of wildlife trafficking, including—

(A) potential threats to security, including corruption and State instability resulting from wildlife trafficking; and

(B) potential threats to public health, including global pandemic and ecosystem collapse;

(6) an examination of how anti-corruption activities might be leveraged with respect to mitigating the ways in which corrupt officials and politically exposed persons enable and engage in wildlife trafficking financing and proceeds;

(7) an examination of payments methods used to facilitate the trafficking of wildlife, including its financing and proceeds;
(8) an examination of how online platforms are used to facilitate trafficking and trafficking-related payments that—

(A) describes the extent to which illicit wildlife trade occurs online, including through social media platforms, ecommerce sites, and encrypted messaging and other surface web platforms;

(C) identifies online platforms that are used most for transactions and payments involving trafficking in wildlife;

(9) an examination of private-sector best practices for combating wildlife trafficking financing and proceeds (including those found in the financial services industry), as well as any practices that have not had success combating wildlife trafficking financing and proceeds;

(10) a discussion of ways in which existing laws, multilateral agreements, and forums could be expanded or modified to combat wildlife trafficking financing and disrupt its proceeds;
(11) an identification of tools of international and national engagement, including partnerships with private sector and international financial institutions, that could be coordinated to combat wildlife trafficking financing and disrupt its proceeds;

(12) recommendations about ways in which interdisciplinary collaboration across Federal agencies could be incentivized to maximize information and analysis from investigations into other types of trafficking and which may benefit from the information and analysis gleaned from wildlife trafficking investigations;

(13) an examination of how data collection, collaboration, analysis, and technology tools, including artificial intelligence and machine learning might be leveraged to combat wildlife trafficking and its proceeds;

(14) a recommendation of whether Congress should renew the wildlife trafficking task force authorized in the END Act and sunsetting in December 2021; and

(15) an examination of how anti-corruption activities and practices could be included in existing Federal and international wildlife trafficking prevention and enforcement efforts.
(c) Classification of Report.—The report required under subsection (a) may be submitted in classified form but shall have an unclassified annex or executive summary.

TITLE V—STUDY ON CHINESE SUPPORT FOR AFGHAN ILICIT FINANCE

SEC. 60501. STUDY ON CHINESE SUPPORT FOR AFGHAN ILICIT FINANCE.

(a) Findings.—Congress finds the following:

(1) Though China and Afghanistan share only a small land border, when it comes to illicit financial activity between the two countries, China has a demonstrated history of permissiveness regarding trafficking and money laundering that could support both the Taliban and its associates.

(2) A 2014 Financial Action Task Force report titled, “Financial Flows Linked to the Production and Trafficking of Afghan Opiates” found evidence of import/export companies registered in China that were transferring funds to Afghanistan, likely as part of trade-based money laundering schemes centered around illicit opium production and trafficking, which, per the United Nations Office on Drugs and
Crime (UNODC), is one of the Taliban’s main sources of income.

(3) Since the U.S. withdrawal from Afghanistan in August 2021, China has announced its willingness to lend financial support and legitimacy to the Taliban-led government in Afghanistan, including Afghan Interior Minister, Sirajuddin Haqqani, a member of the U.S.-sanctions designated Foreign Terrorist Organization, the Haqqani Network.

(4) China’s permissive policies regarding Afghan illicit finance run counter to the strategic interests of the United States with respect to counter-terring trafficking and preventing terrorist groups from accessing the international financial system.

(5) China’s role as a critical source of financial wherewithal for the Taliban and its associates to process and implement drug and other illicit-activity transactions warrants further study as these actions pose a threat both to the safety and security of the people of Afghanistan and the international community.

(6) Congress needs to better understand how China could leverage its relationships and resources within Afghanistan and how these activities could directly or indirectly provide financial support to ter-
rorist organizations, including the Taliban and its associates.

(b) Study.—

(1) Requirement.—Not later than one year after the date of the enactment of this Act, the Secretary of Treasury shall provide to the Committee on Financial Services and the Committee on Foreign Affairs of the House of Representatives and the Committee on Banking, Housing, and Urban Affairs and the Committee on Foreign Relations of the Senate and the Permanent Select Committee on Intelligence of the House of Representatives and the Select Committee on Intelligence of the Senate a report on the financial activities of China and Chinese entities in connection with the finances of Afghanistan and the Taliban.

(2) Matters included.—The report under paragraph (1) shall include the following:

(A) An assessment of the activities undertaken by the People’s Republic of China and Chinese-registered companies to support illicit financial networks in Afghanistan, particularly such networks involved in narcotics trafficking, illicit financial transactions, official corruption,

(B) An assessment of financial, commercial, and economic activities undertaken by China and Chinese companies in Afghanistan to support Chinese policies counter to American strategic interests.

**TITLE XIII—CLIMATE CHANGE**

**EDUCATION**

**SEC. 71301. FINDINGS.**

Congress makes the following findings:

1. The evidence for human-induced climate change is overwhelming and undeniable.

2. Atmospheric carbon can be significantly re-
duced through conservation, by shifting to renewable energy sources such as solar, wind, tidal, and geo-
thermal, and by increasing the efficiency of build-
ings, including domiciles, and transportation.

3. Providing clear information about climate change, in a variety of forms, can remove the fear and the sense of helplessness, and encourage individ-
uals and communities to take action.

4. Implementation of measures that promote energy efficiency, conservation, and renewable en-
ergy will greatly reduce human impact on the envi-
ronment.

5. Informing people of new technologies and programs as they become available will ensure max-
imum understanding and maximum effect of those measures.
(6) More than 3,000,000 students graduate from high schools and colleges in the United States each year, armed with attitudes, skills, and knowledge about the climate that inform their actions.

(7) The effect on the climate, positive or negative, of each of those 3,000,000 students lasts beyond a lifetime.

(8) Those students need to be prepared to implement changes in professional and personal practices, to support and help develop new technology and policy, and to address the coming social and economic challenges and opportunities arising from a changing climate.

(9) It has been demonstrated that the people of the United States overwhelmingly support teaching students about the causes, consequences, and potential solutions to climate change in all 50 States and more than 3,000 counties across the United States.

(10) Only 30 percent of middle school and 45 percent of high school science teachers understand the extent of the scientific consensus on climate change.

“(6) The Secretary shall treat as non-Federal match the value of a working waterfront or interest in a working waterfront, including conservation and
other easements, that is held in perpetuity by a
qualified holder, if the working waterfront or inter-
est is identified in the application for the grant and
acquired by the qualified holder within 3 years of
the grant award date, or within 3 years after the
submission of the application and before the end of

SEC. 80103. STOPPING HARMFUL OFFERS ON PLATFORMS BY SCREENING AGAINST FAKE IN E-COMMERCE.

(a) Contributory Liability for Electronic Commerce Platforms.—Section 32 of the Act entitled “An Act to provide for the registration and protection of trademarks used in commerce, to carry out the provisions of certain international conventions, and for other purposes”, approved July 5, 1946 (commonly known as the “Trademark Act of 1946”) (15 U.S.C. 1114), is amended by adding at the end the following:
“(4)(A) An electronic commerce platform shall be contributorily liable in a civil action under paragraph (1) for a case in which a third-party seller uses in commerce a counterfeit mark in connection with the sale, offering for sale, distribution, or advertising of goods that implicate health and safety on the platform, unless the platform demonstrates that the platform took each of the following steps to prevent such use on the platform before any infringing act by the third-party seller:

“(i) Determined after a reasonable investigation, and reasonably periodically confirmed—

“(I) that the third-party seller designated a registered agent in the United States for service of process; or

“(II) in the case of third-party seller located in the United States that has not designated a registered agent under subclause (I), that the third-party seller has designated a verified address for service of process in the United States.

“(ii) Verified through reliable documentation, including to the extent possible some form of government-issued identification, the iden-
entity, principal place of business, and contact information of the third-party seller.

“(iii) Except as provided for in subparagraph (C), required the third-party seller to—

“(I) take reasonable steps to verify the authenticity of goods on or in connection with which a registered mark is used; and

“(II) attest to the platform that the third-party seller has taken reasonable steps under subclause (I) to verify the authenticity of the goods.

“(iv) Imposed on the third-party seller as a condition of participating on the platform contractual requirements that—

“(I) the third-party seller agrees not to use a counterfeit mark in connection with the sale, offering for sale, distribution, or advertising of goods on the platform;

“(II) the third-party seller consents to the jurisdiction of United States courts with respect to claims related to participation by the third-party seller on the platform; and
“(III) the third-party seller designates an agent for service of process in the United States, or, in the case of third-party seller located in the United States, the third-party seller designates a verified address for service of process in the United States.

“(v) Displayed conspicuously on the platform the verified principal place of business, contact information, and identity of the third-party seller, and the country from which the goods were originally shipped from the third-party seller, except the platform shall not be required to display any such information that constitutes the personal identity of an individual, a residential street address, or personal contact information of an individual, and in such cases shall instead provide alternative, verified means of contacting the third-party seller.

“(vi) Except as provided for in subparagraph (C), displayed conspicuously in each listing the country of origin and manufacture of the goods as identified by the third-party seller, unless such information was not reasonably
available to the third-party seller and the third-party seller has identified to the platform the steps it undertook to identify the country of origin and manufacture of the goods and the reasons it was unable to identify the same.

“(vii) Required each third-party seller to use images that accurately depict the goods sold, offered for sale, distributed, or advertised on the platform.

“(viii) Implemented at no charge from the platform to the registrant reasonable proactive measures for screening goods before displaying the goods to the public to prevent the use by any third-party seller of a counterfeit mark in connection with the sale, offering for sale, distribution, or advertising of goods on the platform. The determination of whether proactive measures are reasonable shall consider the size and resources of a platform, the available technological and non-technological solutions at the time of screening, the information provided by the registrant to the platform, and any other factor considered relevant by a court.

“(ix) Provided reasonably accessible electronic means by which a registrant and con-
sumer can notify the platform of suspected use of a counterfeit mark.

“(x) Implemented at no charge from the platform to the registrant a program to expeditiously disable or remove from the platform any listing for which a platform has reasonable awareness of use of a counterfeit mark in connection with the sale, offering for sale, distribution, or advertising of goods. Reasonable awareness of use of a counterfeit mark may be inferred based on information regarding the use of a counterfeit mark on the platform generally, general information about the third-party seller, identifying characteristics of a particular listing, or other circumstances as appropriate. A platform may reinstate a listing disabled or removed under this clause if, after an investigation, the platform reasonably determines that a counterfeit mark was not used in the listing. A reasonable decision to reinstate a listing shall not be a basis for finding that a platform failed to comply with this clause.

“(xi) Implemented a publicly available, written policy that requires termination of a third-party seller that reasonably has been de-
determined to have engaged in repeated use of a counterfeit mark in connection with the sale, offering for sale, distribution, or advertising of goods on the platform. Use of a counterfeit mark by a third-party seller in 3 separate listings within 1 year typically shall be considered repeated use, but a platform may allow a third-party seller to remain active after repeated use of a counterfeit mark when reasonable mitigating circumstances exist. The determination of whether reasonable mitigating circumstances exist shall consider the overall activity of the third-party seller, efforts the third-party seller has taken to cure supply-chain concerns, efforts the third-party takes to resolve disputes once notified of a concern, and any other factor considered relevant by a court. A platform may reinstate a third-party seller if, after an investigation, the platform reasonably determines that the third-party seller did not engage in repeated use of a counterfeit mark or that reasonable mitigating circumstances existed. A reasonable decision to reinstate a third-party seller shall not be a basis for finding that a platform failed to comply with this clause.
“(xii) Implemented at no charge from the platform to the registrant reasonable measures for screening third-party sellers to ensure that sellers who have been terminated do not rejoin or remain on the platform under a different seller identity or alias. The determination of whether screening measures are reasonable shall consider the size and resources of a platform, the available technological and non-technological solutions at the time of screening, and any other factor considered relevant by a court.

“(xiii) Provided a verified basis to contact a third-party seller upon request by a registrant that has a bona fide belief that the seller has used a counterfeit mark in connection with the sale, offering for sale, distribution, or advertising of goods on the platform except that the platform is not required to provide information that constitutes the personal identity of an individual, a residential street address, or personal contact information of an individual (in such case, the provider shall provide an alternative means of contacting the third-party seller).

“(B)(i) This paragraph shall apply—
“(I) to an electronic commerce platform that has sales on the platform in the previous calendar year of not less than $500,000; or

“(II) to an electronic commerce platform with less than $500,000 in sales in the previous calendar year, 6 months after the platform has received 10 notices, in aggregate, that qualify under clause (ii).

“(ii) To count toward the aggregate 10-notice threshold under clause (i)(II), a notice shall—

“(I) include a reference to this paragraph;

“(II) include an explicit notification of the 10-notice limit and the requirement of the platform to publish the information in clause (iii); and

“(III) identify a listing on the platform that reasonably could be determined to have used a counterfeit mark in connection with the sale, offering for sale, distribution, or advertising of goods that implicate health and safety.

“(iii) Not later than 1 month after the date on which a platform described in clause(i)(II) receives the first notice described under clause (ii), the platform shall make publicly available an attestation that the sales on the platform in the previous cal-
endar year were less than $500,000 and an aggregate count of the notices that qualify under clause (ii). Such count shall be updated upon receipt of additional notices.

“(C) Notwithstanding clauses (iii) and (vi) of subparagraph (A), a platform is exempt from the requirements of such clauses for goods, on or in connection with which a registered mark is used, sold, offered for sale, or advertised by a third-party seller for less than $5,000 if the third-party seller sells, offers for sale, or advertises on the platform 5 or fewer goods of the same type in connection with the same mark in a 1-year period.

“(D) This paragraph may not be construed to limit liability in contexts other than those described in this paragraph, including any cause of action available under any other provision of this Act, notwithstanding that the same facts may give rise to a claim under this paragraph.

“(E) With respect to fiscal year 2024, and each fiscal year thereafter, the amounts in subparagraphs (B) and (C) shall be increased each year by an amount equal to the percentage increase, if any, in the Consumer Price Index.

“(F) In this paragraph:
“(i) The term ‘counterfeit mark’ has the meaning given that term in section 34(d)(1)(B).

“(ii) The term ‘electronic commerce platform’ means any electronically accessed platform that includes publicly interactive features that allow for arranging the sale or purchase of goods, or that enables a person other than an operator of the platform to sell or offer to sell physical goods to consumers located in the United States.

“(iii) The term ‘goods that implicate health and safety’ means goods the use of which can lead to illness, disease, injury, serious adverse event, allergic reaction, or death if produced without compliance with all applicable Federal, State, and local health and safety regulations and industry-designated testing, safety, quality, certification, manufacturing, packaging, and labeling standards.

“(iv) The term ‘third-party seller’ means a person other than the electronic commerce platform that uses the platform to arrange for the sale or purchase of goods.”.

“(b) Action by Electronic Commerce Platform.—

“(1) Authority to bring action.—If a third-party seller who otherwise could bring an action under subsection (a), consents and declines to
file suit, an electronic commerce platform may bring
an action under subsection (a) against a person who
knowingly made a material misrepresentation in 10
or more notices to the platform alleging that a coun-

seller for goods that implicate health and safety.

“(2) Consent by third-party seller re-
quired.—Consent shall be obtained in writing from
each third-party seller to which the notices covered
by the civil action were directed.

a third-party seller shall be made in specific ref-

been filed with the electronic commerce platform and
removal or disablement has occurred.

“(c) Statutory Damages.—Any person who brings
a claim under this section may elect, at any time before
final judgment is rendered by the trial court, to recover,
instead of actual damages, statutory damages in the
amount of—

“(1) not less than $2,500 or more than
$15,000 per notice containing a knowing, material
misrepresentation; or
“(2) if aggravating circumstances exist, not less than $15,000 or more than $75,000 per notice containing a knowing, material misrepresentation.

“(vi) ADDITIONAL ASSURANCE BY STATE BOARD.—The Secretary shall not determine that a program is an eligible job training program in accordance with clause (ii) unless the Secretary receives a certification from the State board representing the State in which the eligible job training program is provided, containing an assur-

“(A) IN GENERAL.—Subject to subparagraph (B), as a condition of participation under this subsection, the Secretary shall, using the data collected under paragraph (8) and such other information as the Secretary may require, determine whether such job training program meets the requirements of paragraph
(1)(B)(i)(V) with respect to whether the stu-
dents who complete the program receive a me-
dian increase of 20 percent of such students’
total earnings. For the purposes of this para-
graph, the Secretary shall determine such per-
centage increase by calculating the difference
between—

“(i) the total earnings of students who
enroll in such program, calculated based
on earnings approximately 6 months prior
to enrollment; and

“(ii) the total earnings of students
who complete such program, calculated
based on earnings approximately 6 months

“(6) INCLUSION IN TOTAL ELIGIBILITY PERIOD.—Any period during which a student receives a job training Federal Pell Grant under this subsection shall be included in calculating the student’s period of eligibility for Federal Pell Grants under subsection (d), and the eligibility requirements regarding students who are enrolled in an undergraduate program on less than a full-time basis shall similarly apply to students who are enrolled in an eligible job training program at an eligible institution of higher education on less than a full-time basis.

“(B) DATA ON ELIGIBLE JOB TRAINING PROGRAMS.—Except as provided under subparagraph (C), using the postsecondary student data system established under section 132(l) or a successor system (whichever includes the most recent data) to the greatest extent practicable to streamline reporting requirements and minimize reporting burdens, an in coordination with the National Center for Education Statistics, the Secretary of Labor, and each institution of higher education offering an eligible job training program for which the Secretary awards job training Federal Pell Grants under this subsection, the Secretary shall, on at least an an-
annual basis, collect and publish data with respect to each such eligible job training program, including, at a minimum, the following:

“(VI) the share of such students who complete a subsequent certificate or degree program at any institution
of higher education within 6 years of completing the eligible job training program.

“(C) EXCEPTIONS.—Notwithstanding any other provision of this paragraph—

“(i) if disclosure of disaggregated data under subparagraph (B) is prohibited from disclosure due to applicable privacy restrictions, the Secretary may take such steps as the Secretary determines necessary to provide meaningful disaggregated student demographic or outcome information, including by combining categories; and

SEC. 106002. LIMITATION ON DUTY SUSPENSIONS OR RE-
DUCTIONS FOR FINISHED GOODS.

(a) LIMITATION ON ELIGIBILITY.—Section 3(b) of
the American Manufacturing Competitiveness Act of 2016
(19 U.S.C. 1332 note) is amended as follows:

(1) In paragraph (2)—

(A) by redesignating subparagraph (K) as
subparagraph (L); and

(B) by inserting after subparagraph (J)
the following:

“(K) A certification that the article is not
a finished good, defined as a good that—

“(i) is ready for sale to the ultimate
purchaser, end user, or consumer, whether
or not packed or repacked after entry into
the customs territory of the United States
(as such term is defined in General Note
2 to the Harmonized Tariff Schedule of
the United States) for retail sale;

“(ii) will not undergo any substantial
processing or transformation, as such
terms are interpreted by U.S. Customs and
Border Protection, after entry into the customs territory of the United States;

“(iii) is an unassembled, disassembled, or otherwise incomplete good, having the essential character of the complete and assembled finished good; or

“(iv) is solely intended to be—

“(I) repacked to make the good suitable for retail sale or distribution;

“(II) retagged or relabeled;

“(III) combined with instructional or warranty materials or with other items or accessories for post-entry sale; or

“(IV) subjected to other minor operations not substantially transforming the good as entered into the customs territory of the United States.”.

(2) By amending paragraph (3)(C)(ii)(IV) to read as follows:

“(IV) A list of petitions for duty suspensions and reductions for which the Commission recommends modifications to the scope of the articles
that are the subject of such petitions,
with the modifications specified—

“(aa) to address objections
by domestic producers to such
petitions; or

“(bb) to ensure that the ar-
ticles are not finished goods as
defined under paragraph
(2)(K).”.

(3) By amending paragraph (3)(C)(ii)(VI) to
read as follows:

“(VI) A list of petitions for duty
suspensions and reductions that the
Commission does not recommend for
inclusion in a miscellaneous tariff bill,
other than petitions specified in sub-
clause (V), including petitions for
which, in the view of the Commission,
the articles that are the subject of the
petitions are finished goods, as de-
dined under paragraph (2)(K).”.

(b) MODIFICATION TO COMMERCE REPORT.—Section
3(e) of the American Manufacturing Competitiveness Act
of 2016 (19 U.S.C. 1332 note) is amended by adding at
the end the following new paragraph:
“(3) An identification of any article that is subject to an order issued pursuant to title VII of the Tariff Act of 1930 (19 U.S.C. 1671 et seq.) whose article description may overlap with the article description of the subject of the petition.”.

(c) PROMULGATION OF LIST.—The United States International Trade Commission may issue such guidance, including in the form of a list of goods presumed to be finished goods and their accompanying headings under the Harmonized Tariff Schedule of the United States, as the Commission determines useful or necessary to provide information to petitioners with respect to the limits imposed on duty suspensions and reductions by reason of the amendments under subsection (a).

SEC. 106003. SENSE OF CONGRESS ON UNITED STATES COMMITMENT TO THE WORLD TRADE ORGANIZATION.

(a) FINDINGS.—Congress finds the following:

(1) The United States is an original member of the World Trade Organization (WTO) and a key architect of the institution.

(2) The WTO is a critical forum for strengthening the multilateral rules-based trading system and a bedrock of United States trade policy.
(3) The United States has provided the leadership and political will to advance the goal of the WTO to create and enforce rules that reduce obstacles to international trade that help ensure a level playing field.

(4) Sustained United States leadership in the WTO provides best paths to achieve necessary WTO reforms, create new trade rules that enhance opportunities for all, and address the needs and challenges of the United States and all other free and open economies in the 21st century.

(5) The United States recognizes the historic nature of Dr. Ngozi Okonjo-Iweala’s selection as the WTO’s new Director-General as being both the first woman and first African to be chosen.

(6) The WTO recognizes that trade should be conducted with a view to raising standards of living, ensuring full employment and a large and steadily growing volume of real income and effective demand, expanding the production of and trade in goods and services, optimally using the world’s resources in accordance with the objective of sustainable development, and seeking to protect and preserve the environment.
(7) The WTO is the preferred forum in which member economies resolve disputes that arise among them.

(8) The United States has consistently supported having a functional, efficient dispute settlement mechanism at the WTO that strictly follows the Dispute Settlement Understanding as agreed by all WTO members and remains accountable to WTO members.

(9) The United States, for decades, has sought to strengthen the WTO dispute settlement system by advocating for necessary, thoughtful and prudent reforms.

(10) The United States has expressed longstanding concerns that the WTO Appellate Body, through its findings and procedural liberties, is improperly adding to or diminishing the rights or obligations of WTO members.

(11) The United States has consistently urged the WTO to improve transparency by requiring that all dispute settlement hearings at the WTO be open to the public, and all submissions by the parties be publicly available.

(12) While several WTO members have joined the United States in agreeing to open hearings to
the public and in making public submissions, most WTO Members continue to insist on closed hearings and confidential submissions.

(13) Transparent WTO dispute settlement enhances WTO members’ understanding of the dispute settlement system, particularly for those who do not participate often in the system.

(14) Open dispute settlement promotes the accountability, professionalism, and impartiality of WTO adjudicators, to the benefit of the dispute settlement system as a whole.

(15) Many WTO members have failed to meet basic notification obligations making it difficult and, in some cases, impossible to monitor or determine their compliance with WTO obligations, including subsidies disciplines.

(16) The United States has encouraged, by proposing various incentives and administrative measures, better compliance with notification obligations.

(17) The WTO allows members to self-identify as developing countries in order to receive special and differential treatment.

(18) Some self-declared developing countries that are now advanced continue to demand the same special and differential treatment intended for much
smaller, less developed members, creating asymmetries that hinder the WTO from achieving meaningful outcomes in current and future negotiations.

(19) For over a decade, most WTO members have refused to engage in serious efforts to address longstanding United States calls for reform of dispute settlement and other important aspects of the WTO system.

(20) WTO members are engaged in negotiations to reform the WTO and create new rules, including with respect to fisheries subsidies and e-commerce.

(b) SENSE OF CONGRESS.—It is the sense of Congress that—

(1) the United States should continue to lead reform efforts to ensure that the World Trade Organization (WTO) functions as agreed by the membership and is updated appropriately for the 21st century;

(2) the United States should continue to urge other WTO members to work with the United States to achieve needed reforms so that the WTO and its members can address unjustified barriers to trade
and promote economic norms that improve the
standard of living across the world; and

(3) the United States Trade Representative
should continue to lead and work with other coun-
tries to pursue reforms at the WTO that—

(A) address concerns with the WTO’s Ap-
pellate Body;

(B) improve the efficiency and trans-
parency of dispute settlement proceedings;

(C) remediate the failure to satisfy notifi-
cation obligations of the various WTO agree-
ments and develop accountability mechanisms
to address this issue proactively;

(D) discipline the use of special and dif-
ferential treatment for self-declared developing
countries;

(E) ensure there are platforms to discuss
issues related to labor, the environment, and
women’s economic empowerment; and

(F) create new rules and structures that
can serve the United States interests while pro-
moting peace, prosperity, and open markets and
societies.
SEC. 106004. AUTHORITY OF U.S. CUSTOMS AND BORDER PROTECTION TO CONSOLIDATE, MODIFY, OR REORGANIZE CUSTOMS REVENUE FUNCTIONS.

(a) IN GENERAL.—Section 412 of the Homeland Security Act of 2002 (6 U.S.C. 212(b)) is amended—

(1) in subsection (b)—

(A) in paragraph (1)—

(i) by striking “consolidate, discontinue,” and inserting “discontinue”;

and

(ii) by inserting after “reduce the staffing level” the following: “below the optimal staffing level determined in the most recent Resource Allocation Model required by section 301(h) of the Customs Procedural Reform and Simplification Act of 1978 (19 U.S.C. (h))”; and

(B) in paragraph (2), by inserting “, National Account Managers” after “Financial Systems Specialists”; and

(2) by adding at the end the following:

“(d) AUTHORITY TO CONSOLIDATE, MODIFY, OR REORGANIZE CUSTOMS REVENUE FUNCTIONS.—

“(1) IN GENERAL.—The Commissioner of U.S. Customs and Border Protection may, subject to sub-
section (b), consolidate, modify, or reorganize customs revenue functions delegated to the Commissioner under subsection (a), including by adding such functions to existing positions or establishing new or modifying existing job series, grades, titles, or classifications for personnel, and associated support staff, performing such functions.

“(2) POSITION CLASSIFICATION STANDARDS.— At the request of the Commissioner, the Director of the Office of Personnel Management shall establish new position classification standards for any new positions established by the Commissioner under paragraph (1).”.

(b) TECHNICAL CORRECTION.—Section 412(a)(1) of the Homeland Security Act of 2002 (6 U.S.C. 212(a)(1)) is amended by striking “403(a)(1)” and inserting “403(1)”.

SEC. 106005. PROHIBITION ON LARGE SCALE TRANSPORTATION OF SODIUM CYANIDE BRIQUETTES FOR MINING PURPOSES IN THE UNITED STATES.

(1) not later than 90 days after the date of enactment of this Act, issue an interim final rule that is effective not later than 30 days after publication in the Federal Register that bans the transportation of sodium cyanide briquettes for mining purposes in the United States, unless such sodium cyanide briquettes are packaged and transported in ISO steel containers and in accordance with the material’s authorized packaging and transportation requirements under parts 171 through 180 of title 49, Code of Federal Regulations; and

(2) complete, not later than 1 year after the date of enactment of this Act, a rulemaking investigating and evaluating the impact on the supply chain, competitiveness, national security, labor, and safety implications of the transportation of sodium cyanide briquettes for mining purposes in the United States using a transportation method other than ISO steel containers, in accordance with the material’s authorized packaging and transportation requirements.

(a) IN GENERAL.—Not later than 60 days after the date of enactment of this Act, the Secretary of Transportation shall seek to enter into an agreement with the National Academy of Sciences under which the National Academy shall conduct a study on the United States supply chain that examines data constraints that impede the flow of maritime cargo and add to supply chain inefficiencies and that identifies data sharing systems that can be employed to improve the functioning of the United States supply chain.

(b) CONTENTS.—The study required under subsection (a) shall include—

(1) the identification of where bottlenecks or chokepoints are most prominent within the United States supply chain;

(2) the identification of what common shipping data is created with each hand-off of a container through the United States supply chain and how such data is stored and shared;
(3) the identification of critical data elements used by any entity covered by subsection (c), including the key elements used for various supply chain business processes;

(4) a review of the methodology used to store, access, and disseminate shipping data across the United States supply chain and evaluation of the inefficiencies in such methodology;

to plan, execute, and monitor the optimal loading
and unloading of maritime cargo; and

and reliability of the international ocean
transportation supply system;

an emergency order under subsection (b), the Com-
mission shall ensure that such order includes param-
