Hi all-

Once this is ready for shipment, please overnight it to the following address:

CESC – Cage # [REDACTED]
C/O Equinix

[REDACTED]

[REDACTED]

We need to be notified of when it is shipping and arriving, the weight of the package, and the tracking number – the datacenter requires us to put in a shipping ticket for all shipments sent to them, or they may reject it!

Hopefully this will be sent out by tomorrow. We are only onsite from this Friday evening through Monday afternoon, and the datacenter will only hold packages for three days.

Thanks, let me know if you have any questions!

Paul

Super. You know Platte. They are doing the setup. I have added them on the email as Bill will be at the data center on the 23rd. They can help with the details.

Were getting close so I'm not positive but what you can do to help is to have the pre-installation form completed and sent to me ASAP. This will allow me to have a Tech configure it and ready it for shipping. I can ship as soon as we receive the signed purchase agreement so I'll be working on that shortly and have it to you this afternoon.

We ship to the person and address on the pre installation form.

Thank you,
Dale

Super. Do we think we can still have the box shipped up for the install on the 23rd. Do you need to know where to ship it or the firewall or anything?

Good morning,

Yes we can, I will have some time to amend the agreement after lunch so I'll have it back to you this afternoon.

Thank you for all your help!

Dale

Perfect.

Can you add that into the agreement or something. An appendix or whatever.

Otherwise, we are good to go. Just let us know what to sign and send the \$.

Good morning,

Great news! Thank you. The only two people that can make any rule changes are John Meyer (SOC Manager) and Wazir Shpoon (Director of Engineering) both very tenured employees so let me know if you need any additional information on those two.

Additionally, we can limit the number of SOC personnel that work on this account to about 3 or 4, in order to assure around the clock coverage. If you think about 3 eight hour shifts daily and weekends, we can provide the name of those employees if you like.

Last, I will check with Wazir to have him test the header question but I'm almost certain that he can adjust that so all we see is the To & From & Date. I will get back to you on this one.

Thank you,
Dale

Hi:

It is all approved. We can fill it out. We just need 1 thing...that the two folks are the only ones that can make changes to the rules, and I was going to say that folks in the monitoring part would not know their name, but they will see the To and from and domain, so they will know. Can we limit those that monitor in addition to post? Also, did you find out how much of the body of the email we can limit.

Tania

Good morning Tania,

I'm starting to get caught up a bit after our move and I'll be working on the background check / credentials on the SOC personnel we discussed in our meeting last week. Once I have it I'll forward those along and I would expect to have them to you by Wednesday.

I will have the quote to you this morning.

Thank you,
Dale
